

Test Primo Eq Anavar - 80 Mg Of Anavar

VISIT OUR STORE: <https://t.co/nolTT3oGt3>

weeks 1-5 anavar @ 30mg ed [qv] weeks 1-5 primo @ 100mg ed [qv] weeks 1-13 test enan @ 500mg/week [either qv or animal power] weeks 1-12 eq @ 500mg/week [either qv or pets pharma] pct 17 days after last test shot. I have nova on hand but I dont useit unless I feel like im getting gyno. 1-16 Test Enanthate 500mg ew 1-15 Eq 800mg ew 1-16 Primobolan 800mg ew 1-6 anavar 80mg ed 13-18 anavar 80mg ed 1-18 proviron 50mg ed 1-18 aromasin 12.5 e2d gw501516 , sr9009 and s4 will be added to the cycle also , PCT will look like this: nolva 40/40/40/20/20/20 clomid 50/50/50/25/25/25 aromasin 12.5mg e2d My previous cycles was Test E 500mg 10weeks, Test E 500mg and Tbol first 6 weeks and Test E 500mg and Anavar 50mg last 6 weeks off the cycle. Stats: 39 years old, 5'8", 203 lbs, aprox 14% BF. Summer cycle. Goal is to gain quality muscle. I've ran both test and var before so the only compound I don't have any experience with yet is primo. - primo is commonly faked(often masteron e or eq or test prop (thats for all aas tho)) where as masteron e is less faked. If not purchased yet I

recommend just using mast e as the affects are similar. Real primo is pretty expensive. Either way (primo or mast e) get those does up. 700 sounds better then 500. They are pretty gentle substances. 3rd cycle Primo/Anavar/Test E. I'm 30 years old, 5' 10", 225lbs w/16% bf right now. Now, my diet is great and so is my training. I do weight training 4 days a week, plyo/kickboxing once a week and cardio 3-4 days a week (after weights). My first cycle (if you want to call it that) was 25mg winstrol 2x day for 8 weeks about 3 years ago. <https://esdat.s3.eu-west-3.amazonaws.com/Genotropin+Goquick+12+Mg+Pre+Filled+Pen+Buy+Steroids+Online.pdf>
