Testosterone (T) is a naturally occurring steroid hormone. It is made in the Leydig cells of the testes and has two main functions: Anabolic - increases muscle mass by elevating protein synthesis. Keeps you strong and athletic. The Ultimate Testosterone Boosters: It shouldn't be hard to figure out but when it comes to increasing testosterone the true and 100% effective testosterone boosters will always be anabolic steroids; most notably, synthetic testosterone. A testosterone booster will help support optimal T levels which helps build more muscle. But it won't turn you into a Mr Olympia winner like Arnold

Schwarzenegger or Phil Heath. This is why anabolic steroids hold so much more appeal. They can provide the easy muscle gains that may otherwise seem impossible. For the performance enhancer who supplements with anabolic steroids the best testosterone booster he will ever use is simply that of pure testosterone. Exogenous testosterone, in any form is truly the best testosterone booster we have at our disposal as it will efficiently and effectively increase your total levels more so than anything else.
