Email a Friend About This Item: Trenbolone acetate (TBA), an androgenic/anabolic steroid (AA), is a potent agonist of androgen receptors and has been extensively used as a growth promoter. TBA is a progestin and does not convert to estrogens. The effects ... TRIPLE TRENABOL 200mg 10ml (XT Labs) trenbolone blend. It's been formulated with three different esters: trenbolone acetate, trenbolone hexahydrobenzylcarbonate, and trenbolone enanthate (for details on each specific trenbolone ester, see: Trenbolone Acetate, Parabolan, and Trenabol 200). TRENBOPLEX E 10ml 200mg (XT Labs)) is a steroid which possesses strong androgenic properties. Sweating and a decrease in cardiovascular capability are often widely reported with Trenbolone Enanthate usage. Trenbolone Enanthate is not suitable for one who plays any kind of sports that require cardiovascular fitness.
