You dont really want to go under 50mg ed, Priviron has a very low AR binding ability but has many other benefits that outweigh that aspect, I am on 75mg of Priviron ED as I raised it from 50mg, and my poor chick cant walk she gets nailed so much 22-May-2006, 11:02 AM #4 Proviron, also known as Mesterolone, is an orally active compound that has been prescribed to men struggling with hypogonadism - a condition in which they are unable to produce as much testosterone as they should be.

Many bodybuilders and athletes have become curious about Mesterolone. There are athletes and bodybuilders out there taking up to 75 mg of Proviron per day and not experiencing any side effects because of it. The duration of a cycle shouldn't exceed six weeks at a time. It is recommended to take four weeks off after such a cycle. This can be repeated though over and over again.
