PSSR REGULATIONS

Kalea machines are fitted with steam boilers that are subject to PSSR 2000 regulations. The regulations impose duties on those who operate or own machines that use steam under pressure. They need to be inspected at regular intervals at least every fourteen months by a competent person according to a written scheme. The written scheme of examination is provided by Evoca with every machine (further copies are available on request). If you do not have access to a competent person Evoca can provide a list of suppliers that offer this service Insurance companies may insist on using their own resource and you should contact them for advice.
