Orchestra

An elegant and innovative design

- Black anodised aluminium cabinet with framed user interface.
- Orchestra is available with numeric capacitive keypad or touch screen selection area.
- 4.3" full colour graphic display for broadcasting nutritional information, slide shows or adverts.
- White cabinet with LED lighting, and transparent drawers for the best visibility of the products inside.

An elegant and refined model

VisioShop, panoramic drawers for perfect visibility

High definition window

Orchestra is available in standard or touch versions

Necta reserves the right to alter specifications without notice.

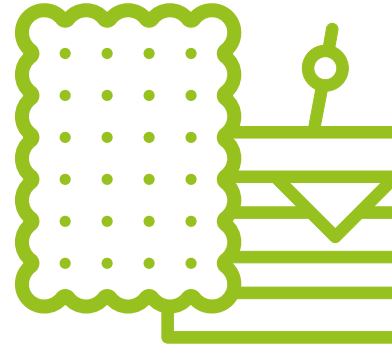

Flexibility

- Shelves can be easily positioned inside the cabinet thanks to the Vertical flex (V-Flex) system.
- Optimisation of shelf space to accommodate different pack sizes simultaneously.
- Transparent VisioShop trays allow light to pass through, giving greater visibility of the products and offering the possibility to go from 8 to 10 selections per tray (up to 38 additional snack products).
- Enhanced ETL on trays (Orchestra Touch only).
- VisioShop trays are sturdy and able to withstand loads up to 53kg.

Energy efficiency

- Foamed cabinet offers excellent insulation properties.
- Highly efficient components.
- Drastic reduction in energy consumption in comparison with previous Snack & Food models.

Orchestra

Orchestra is an 8 spiral machine with incredible performance. Among the many innovations are high levels of energy efficiency and transparent, modular and reconfigurable VisioShop trays which offer the possibility to go from 8 to 10 selections per tray. Orchestra has an elegant design: the black anodised aluminium cabinet features an interface area in black metal with diamond frame, which houses a wide colour graphic display together with a capacitive numeric keyboard. Technological innovations, refined aesthetics, excellent performance: Orchestra has all the assets required to establish itself as the new benchmark among vending machines for the most demanding locations.

Orchestra Touch ETL

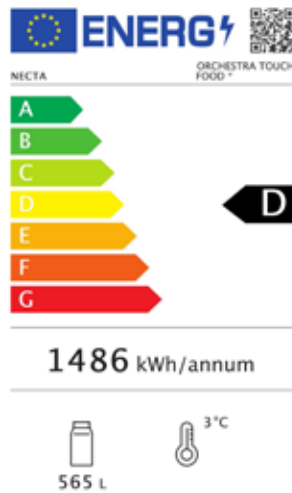

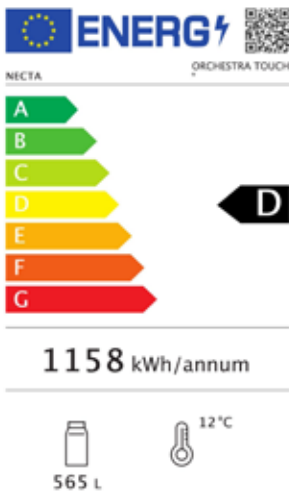

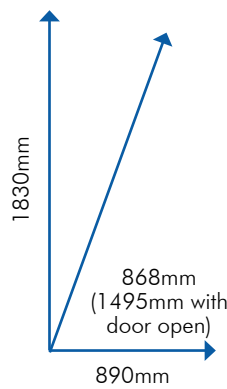

Orchestra Touch, the most flexible innovation you can think of!

Among other innovations, this model features an intuitive and simple touch selection area. Product selection and access to nutritional facts are easy and immediate. Meanwhile, transparent VisioShop trays allow light to pass through, giving greater visibility of the products and offering the possibility to go from 8 to 10 selections per tray.

The Electronic Tray Labelling provides additional communication benefits and will enable you to update prices, promote new products and highlight special promotions.

Electronic Tray Labelling

This new technology has been added to selected snack machines and allows you to offer live pricing, highlight promotional offers, advise consumers of allergen and nutritional information and manage planograms. All of these features will help to increase sales, enhance the users experience and simplify operating tasks.

ETL can be managed directly on the machine, through Giga software, on a PC.

Boosts Sales

- Automatic price changes allow you to offer happy hours or scheduled special offers
- Ability to display long messages on the trays to give more information about product promotions
- You can customise 5 promotional messages that appear under the product

Enhances Consumer Experience

- Clear pricing and description directly underneath the product
- Simple display of nutritional information about the selected product e.g. Gluten Free
- After the product has been selected, it is the only one highlighted, all the other selections are automatically blanked out

Simplify Operating Tasks

- When the machine is open it shows the planogram which allows for easy and quick refilling by the merchandiser
- Error messages are shown directly under the problematic spiral allowing for immediate diagnostics of machine faults
- The machine set up (prices and messages) can be copied across machines using an UpKey, great for multi machine installs

VENDING MACHINES FOR PERSONAL PROTECTIVE EQUIPMENT DISTRIBUTION

PPE - Masks and other Personal Protective Equipment

- Employee protection through automated mask and other PPE distribution.
- Easy and traceable unattended distribution.
- 24/7 availability at strategic workplace locations.
- Consumption Control.

Orchestra vending machine is the safest and most efficient solution to protect your employees.

Capacity and Configuration

- Multi product vending machine designed to distribute masks and other PPE items.
- Layout: up 7 trays and 8 spirals per tray, configurable according to requirements of the location.
- Variable capacity from 448 to 616 items, dependent upon product packaging and mix.
- Modular and transparent trays for an optimum product presentation inside the machine.
- Product elevator capable of dispensing fragile items.

We will assist you to customise, program and install your machines so that they can be put to use without delay.

The product display area is equipped with a security lock and LED lighting.

Control and monitor each employee's consumption through their card.

Motorised opening of the pull out delivery bin, ergonomic, hygienic and hand-free.

Orchestra vending machine for PPE distribution

Positioning, installation and programming

- Compact dimensions: one or more machines can be easily installed in strategic workplace locations.
- Free standing, plug and play machines, ready to operate where they are most needed.
- Customisable programming with single-user access cards, which allocate the PPE required per individual over a specific period of time.
- Programmable access to the vending machine:
 - 24/7 option: allows product dispensing at any time, avoiding people gathering whilst waiting to use the vending machine.
 - Programmable option: restricts use of the dispensers to specific user-defined time slots.

Machine Management & Consumption Control

- The consumption control system allows the use of the machine by each individual employee to be monitored through their personal card.
- Distribution is monitored by an infra red system located in the delivery bin.
- Each employee's consumption data is retrievable and can be stored or uploaded to the company ERP.
- Automatic pull out delivery bin simplifies both product collection and machine cleaning.
- The machine has a capacitive keyboard and a colour display for broadcasting adverts and videos.
- LED lighting ensures excellent product visibility.
