Swing

Impulse Machines

NECTA

Swing

Design and user interface

- Elegant and uncluttered design.
- Capacitive keyboard and wide graphical display.
- LED lighting inside the white cabinet for maximum visibility of the displayed products.

An elegant and uncluttered design

Maximum flexibility

- Up to 6 trays which can be easily moved thanks to Vertical Flex (V-Flex) system.
- Space optimisation inside the cabinet.
- With two **optional** Visioshop trays it is possible to create a special area for products with non standard packaging.
- Enhanced ETL trays (depending on model).
- Wider delivery bin.

High visibility cabinet
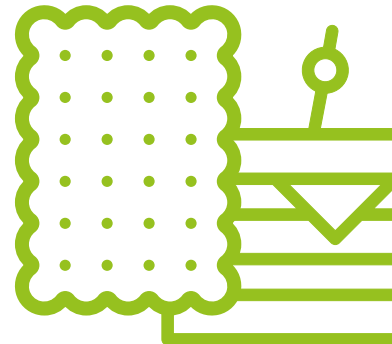

High energy efficiency

- C class according to EN 50597 scale.
- Perfect insulation of the cabinet.
- Cooling unit with R290 gas.
- High energy efficiency and dramatic decrease of pull down time.
- Swing can manage up to two temperatures inside the cabinet.

Electronics

- Swing is compatible with Newis Hi! solution.

Swing

Swing is the new Necta dispenser which brings enhanced performance and quality to the Impulse market. It responds to the need for a reliable, high-capacity model; it is compact yet flexible and can be comprehensively customised in terms of the product offer. Swing's benefits include an optimised and flexible internal configuration which allows the management of many different packaging sizes and products.

Added to this, Swing has reached a market-leading, C Class in energy efficiency, according to the new European Ecolabelling.

Electronic Tray Labelling

This new technology has been added to selected snack machines and allows you to offer live pricing, highlight promotional offers, advise consumers of allergen and nutritional information and manage planograms. All of these features will help to increase sales, enhance the users experience and simplify operating tasks.

ETL can be managed directly on the machine, through Giga software, on a PC.

Boosts Sales

- Automatic price changes allow you to offer happy hours or scheduled special offers

- Ability to display long messages on the trays to give more information about product promotions

- You can customise 5 promotional messages that appear under the product

Enhances Consumer Experience

- Clear pricing and description directly underneath the product

- Simple display of nutritional information about the selected product e.g. Gluten Free

- After the product has been selected, it is the only one highlighted, all the other selections are automatically blanked out

Simplify Operating Tasks

- When the machine is open it shows the planogram which allows for easy and quick refilling by the merchandiser

- Error messages are shown directly under the problematic spiral allowing for immediate diagnostics of machine faults

- The machine set up (prices and messages) can be copied across machines using an UpKey, great for multi machine installs
