

Vivace Range

Snack & Food

Design and user interface

- Essential design easy to fit in any location.
- Capacitive keyboard and TFT display 4,3" capable to feature spot, adv and nutritional facts.
- LED lighting of the white cell for enhanced visibility of the displayed products (+ 35% luminosity).

Maximum flexibility

- Vivace is available as a Slave model too
- Up to 6 trays which can be easily moved thanks to Vertical Flex (V-Flex) system.
- The space inside the cell is optimized; the enhanced distance between trays and glass window allows the dispensing of products with non standard packaging, such as salads and ready to go meals
- Delivery bin with wider opening
- Enhanced ETL trays.

High energy efficiency

- C class according to EN 50597 scale.
- Perfect insulation of the cabinet.
- Cooling unit with R290 gas.
- High energy efficiency and dramatic decrease of pull down time.
- Vivace can manage up to three temperatures inside the cell or can be set with a 100% Food or Ambient layouts.

Electronics

- Vivace is compatible with Newis solutions.
- With Breasy it is possible to select and pay for your product in a completely touchless mode (with Hi! Platinum Executive)

An elegant and uncluttered design

Vivace

Vivace is one of the most interesting new introductions for the six spiral segment, and offering technological solutions typical of the high-end products of our range.

With high energy efficiency, a dark grey uncluttered design and advanced performance, Vivace will fully complement its environment and is particularly suited to locations where space is limited.

Electronic Tray Labelling

This new technology has been added to selected snack machines and allows you to offer live pricing, highlight promotional offers, advise consumers of allergen and nutritional information and manage planograms. All of these features will help to increase sales, enhance the users experience and simplify operating tasks.

ETL can be managed directly on the machine, through Giga software, on a PC.

Boosts Sales

- Automatic price changes allow you to offer happy hours or scheduled special offers
- Ability to display long messages on the trays to give more information about product promotions
- You can customise 5 promotional messages that appear under the product

Enhances Consumer Experience

- Clear pricing and description directly underneath the product
- Simple display of nutritional information about the selected product e.g. Gluten Free
- After the product has been selected, it is the only one highlighted, all the other selections are automatically blanked out

Simplify Operating Tasks

- When the machine is open it shows the planogram which allows for easy and quick refilling by the merchandiser
- Error messages are shown directly under the problematic spiral allowing for immediate diagnostics of machine faults
- The machine set up (prices and messages) can be copied across machines using an UpKey, great for multi machine installs
