## **PUSH ALONG HOOP**

## **The Game**

We are delighted to introduce *Push Along Hoop*, a modern variation on the traditional game which dates back to Ancient Egyptian times and was enjoyed by the Ancient Greeks and Romans and continues to captivate children all over the world. In ancient times the hoop used to be made of wood or metal but is now fashioned in modern materials.

The object of the game is to roll the hoop forwards guiding its progress with the stick. To keep a straight course requires concentration and agility and to roll the hoop quickly requires dexterity which is usually soon mastered by the determined youngster.

There is scope for all kinds of different play either for children individually or as part of a group - the quickest and more precise participant over a measured course winning the game.

## Happy Hooping!
