## Mini Greenhouses / Cold Frames

### Protecting those precious plants and seeds

This is a great entry level greenhouse for novice gardeners with restricted space or budget, or for seasoned growers that require protection for their plants and seedlings. Comes in kitset form with all fittings and instructions for easy self-assembly.

Dimension 1040mm wide x 550mm deep

Height is 260mm at lower end and 500mm at highest

**4mm Toughened Safety Glass** MG0204TG

**6mm Twinwall Polycarbonate** MG0204PG

# Unique Features

Why our Greenhouses stand out from the rest...

Three quality **Glazing Options** to choose from

## Polycarbonate

6mm Twinwall Insulating Polycarbonate

Keeps the warmth in and the frosts out, protecting your precious plants during the colder months. Covered by a 15 year warranty against breakage and panel blowouts.

**The practical choice!**

## Toughened Glass

4mm Toughened Safety Glass

Glass provides superior clarity and longevity but is now significantly stronger. Made to AS/NZS2208 safety standards, and is safer and more practical. Includes 25 year glazing warranty.

**Looks stunning!**

## Shade Mesh

Expanded Aluminium Shade Mesh

The durable aluminium mesh screen **blocks out the harsh sun** (approx 50%), while providing adequate air-flow and ventilation to promote optimal plant growth. Includes 15 year warranty.

### Opening Vents

Adjustable opening roof vents **provide adequate ventilation** and temperature control. Automatic vent openers are also available.

### Smooth Doors

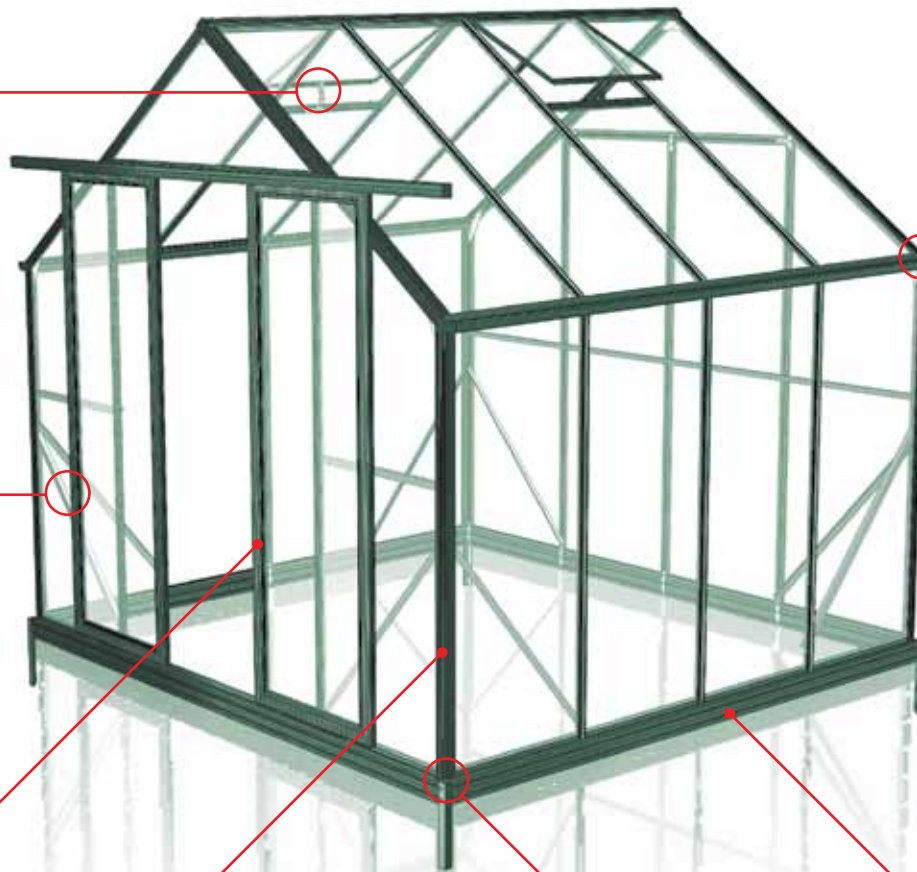

Smooth sliding doors which incorporate a **stainless steel** bearing roller system - runs effortlessly on it's track for years.

Durable, Long lasting, powder coated finish

Finished in green with Dulux Powder coat.

**Looks great and requires minimal maintenance.**

Covered by Dulux non-fade warranty.

### Aluminium frame

Heavy duty aluminium frame to provide years of trouble free service with **minimal maintenance.**

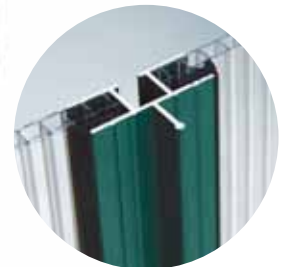

### Base included

All Winter Gardenz Greenhouses come with a **strong aluminium base** and have foundation mounting options to suit most applications.

### Rainwater gutter system

**Unique gutter system** for collecting rain water.

### Rubber bead

Unique rubber bead sealing system designed to **encapsulate the glazing panels** while adding significant strength to the overall structure and no panel blowouts.

### Superior design and construction

Winter Gardenz unique design delivers **superior strength and durability.** There is no other that comes close.

How to choose the Greenhouse for you?

**STEP 1**

Choose a frame width. **6ft, 8ft or 10ft series.** This also determines the height of Greenhouse.

**STEP 2**

Choose the length. **6ft, 8ft, 10ft, 12ft** right up to 36ft or longer? We can do custom lengths.

**STEP 3**

Choose the Glazing. **Toughened Safety Glass, Shade Mesh or Insulating Polycarbonate**

# Elite Series Greenhouses

Traditional style - Superior quality - Fully optioned

Your choice of **frame colour** and toughened safety glass makes the Elite Greenhouse the **perfect addition** to any landscape

## Shade system

The optional shade-cover system provides **protection for your plants** in the hotter months and is removable when not required.

## Gutters and down pipes

Included to enable you to direct the water to a tank if you prefer.

## Full-height doors

Hinged, double opening doors with **quality door handles** and locks.

## Raised walls with low level entry

Designed to be attached to your choice of a **brick, block or stone wall** (not included), while maintaining a ground level entry with minimal threshold

## Finials & crests

These are optional and considered a lovely finish if you prefer the **Victorian style** of Greenhouse.

## Temperature controlled vents

Opens and closes automatically to assist in maintaining the **optimum temperature**

## Superior design & construction

The unique design delivers superior **strength and durability**, with minimal maintenance required.

## Elite Greenhouses

The Elite Greenhouse series has a distinctive, traditional style which make them the ideal choice when quality and aesthetics are important. This range suits the more discerning gardener and makes a perfect addition to any landscaped garden setting.

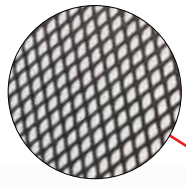

Winter Gardenz Elite range is constructed using only the best materials and design systems to ensure structural integrity is achieved without compromising the elegance and functionality of the Greenhouse.

All Elite Greenhouses include the following...

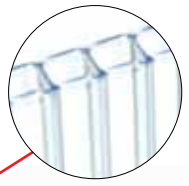

- ✓ Double opening, hinged, lockable doors
- ✓ 3 tier staging down one full side of the greenhouse
- ✓ Shade cover system to protect plants in summer
- ✓ Glazed with 4mm toughened safety glass
- ✓ Your choice of frame colour
- ✓ Temperature controlled vent openers and crop clips
- ✓ Gutter system for rain catchment

# MultiZone Greenhouses

Two growing environments in one structure

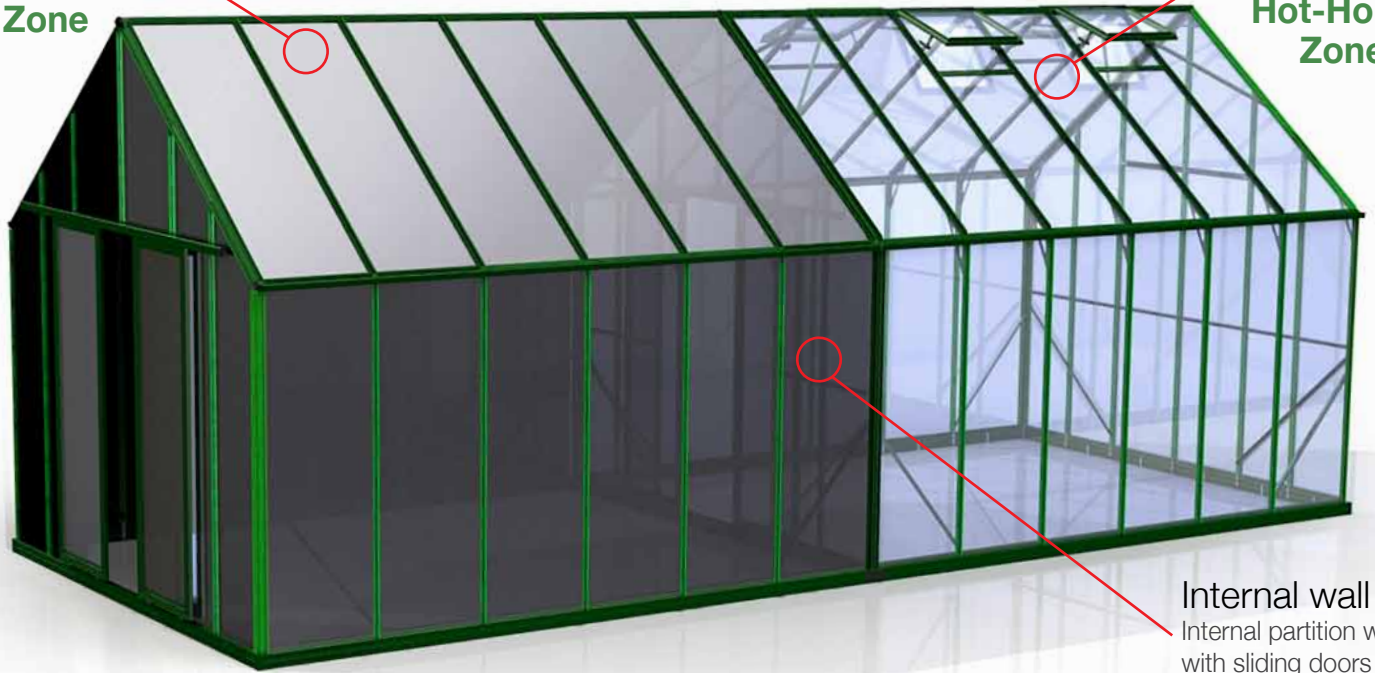

Shade-House Zone

Hot-House Zone

The MultiZone Greenhouse is a **unique and innovative** product that offers the grower the versatility to **grow in just about any climate**

Internal wall  
Internal partition wall with sliding doors

**Unique and practical design**, that looks great and provides a **versatile and flexible** approach to **year round growing**

## MultiZone sizes

### 10x12 MultiZone Greenhouse

W 3220mm x L 3890mm x H 3150mm  
Integrated 6ft hothouse with 6ft Shade-House  
2x double sliding doors, internal partition wall, 2x vents  
**10x12 MultiZone Greenhouse** UG1012XH-MZ

Integrated 12ft hothouse with 12ft Shade-House  
2x double sliding doors, internal partition wall, 4x vents  
**10x24 MultiZone Greenhouse** UG1024XH-MZ

Custom sizes also available.

#### ✓ Adaptable design for all seasons

Both Hot-House and Shade-House, in one structure.

#### ✓ Rigid aluminium shade panels in the Shade-House zone

Blocks out the harsh sun and wind. Also suitable for insect and pest protection.

#### ✓ Thermally efficient polycarbonate glazing in the Hot-House zone

Keeps the warmth in and the frosts out.

#### ✓ Strong and durable frame.

Practical and tough, requiring minimal maintenance.

Winter Gardenz MultiZone Greenhouses are designed to provide growers with the best of both worlds. An enclosed Hot-House with adjoining Shade-House separated by an internal partition wall and sliding door, to create the two zones in one structure

Our MultiZone Greenhouses are constructed from the same durable frame as our popular award winning Greenhouse range, which provides a strong, practical and long lasting structure, requiring very little maintenance.

The Shade-House zone is designed to protect your plants from the hot, direct sun-light, damaging wind and/or pests & insects, while still providing adequate ventilation and air movement in the hot months. It is perfect for light-sensitive plants such as Orchids, Azaleas and Ferns, etc... but is more commonly used for 'Hardening Off' young, delicate plants that have been propagated in the Hot-House zone.

The Hot-House zone is glazed with 6mm twin-wall polycarbonate and creates an ideal growing zone for plants and seedlings, especially when the outside temperature cools. This glazing provides superior thermal efficiency, keeping the warmth in and the frost out.

# Greenhouse Foundations

## How to secure the Greenhouse into position

### Standard Foundations

All our Greenhouses are supplied with our standard corner stakes. Below are two popular methods which can be used to secure your Greenhouse base to the ground.

#### Staked into ground

Staked into ground. **The quickest and simplest method.** Great if you want to move your Greenhouse in the future, but not suitable if your site is exposed to strong winds.

#### Concreted into position

Corner stakes concreted into position. A little more work is required, but provides a **stronger anchor** and better peace of mind.

### Additional mounting options

If you are in a windy or exposed area we recommend you consider attaching the Greenhouse to either a concrete or timber footing using one of our foundation mounting kits.

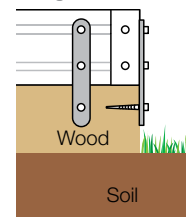

**There are two different styles to choose from**, and they can be attached to the inside or outside of the base. They are designed to be fitted at intervals around the perimeter of the base providing multiple fixing points and offering the best and most secure method for securing your Greenhouse in position.

#### Flush mounting kit

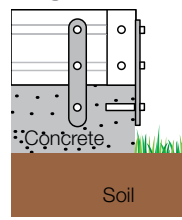

##### Flush Mounting Kit

Fixing to wood

##### FKF12

Fixing to concrete

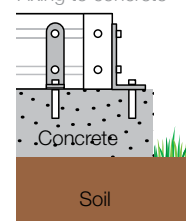

#### Surface mounting kit

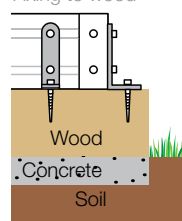

##### Surface Mounting Kit

Fixing to concrete

##### FKS12

Fixing to wood

# Shelving & Staging

Utilise your growing space more effectively

### Hanging Shelving

#### More growing area

Wall mounted shelving  
Durable aluminium construction  
Adjustable height  
Powder coated green  
Quick and easy to assemble

**Hanging Shelving 900mm wide** HS0900

**Hanging Shelving 1200mm wide** HS1200

**Hanging Shelving 1500mm wide** HS1500

### Standing Shelving

#### Ideal working space

2 Tiers  
Quick and easy to assemble  
Heavy duty construction  
Made from aluminium  
Powder coated green

**Potting Bench 900mm wide** PB0900

**Potting Bench 1200mm wide** PB1200

**Potting Bench 1500mm wide** PB1500

### Staging

#### Maximise storage

3 Tiers  
Quick and easy to assemble  
Heavy duty aluminium construction  
Powder coated green

**Staging 6ft Long** ST06

**Staging 8ft Long** ST08

**Staging 10ft Long** ST10

**Staging 12ft Long** ST12

### Shelving Brackets

#### Cost effective shelving

Maximizes your growing and storage areas  
Adjustable height  
Slats not included

Also suitable for hydroponic gullies

**Shelving Brackets 150mm wide** SB150

**Shelving Brackets 300mm wide** SB300

**Shelving Brackets 450mm wide** SB450

# Greenhouse Accessories

Customise your Greenhouse to suit your needs

## Water Tanks

**Water storage to feed your plants**

Large 200L capacity  
Tough, durable plastic  
Includes brass tap

**200L Water Tank**

TANK200

## Down Pipe Kits

**Collect rainwater**

Connects your Greenhouse gutters to any water tank. Made from tough, durable plastic. Includes end caps for gutters and 4m of hose

**Down Pipe Kit**

DPK01

## Auto Vent Openers

**Ideal for summer**

Opens when it's hot and closes when it's cold. Strong, durable and reliable  
No power required, easy to fit

**Auto Vent Opener**

AV01

## Hanging Brackets

**Create vertical or horizontal string lines**

Ideal for climbers & secure tomatoes etc  
Perfect for hanging plants and baskets  
Easy to assemble

**Hanging Brackets 6pk**

HBA6

## Temp & Humidity Meters

**Measures & records** the min/max, past & current humidity & temperature  
Large clear digital readings  
Easy to use

**Temperature & Humidity Meter**

THM01

## Heat Pads

**Get those seedlings started**

Strong & durable construction  
Supplies constant warmth  
3 year warranty, easy to use  
Colour may vary from picture

**Heat Pad**

HP01

## Louvre Vent Kits

**Improve airflow**

Easily fitted to your Greenhouse  
Ideal for the summer months  
Durable construction. Easy to install

**Louvre Vent Kit (Poly)**

LVK3-PC6

**Louvre Vent Kit (Retro Poly)**

LVK3-PC6-RETRO

**Louvre Vent Kit (Glass)**

LVK3-TG4

## Shade Cover Kits

**Protect your plants**

Protect plants from the sun's harsh rays (68% block-out). Reduces the inside temperature. Supported in position with a durable aluminium frame system. Black cloth is standard, with other colours available on request.

# Custom and Commercial

Custom design and build service, nationwide

## Custom Greenhouses

Designed & built to suit your requirements...

### ✓ Glazing options

Choose from Toughened Safety Glass, Structured Polycarbonate or Plexiglas sheet, flexible Polyethylene film or rigid Aluminium shade mesh/screen panels

### ✓ Sizes to suit your needs

Multi-spans, lengths and heights to suit your size, site and budget requirements

### ✓ Quality materials, superior construction

Our unique profile design creates a strong and durable frame system that offers versatility and requires minimal maintenance

### ✓ Automation and climate control

Ventilation and heating systems are also available and can be designed for your specific requirements

Not only are our Greenhouses ideal for commercial growing operations but the unique design and construction makes them a suitable structure for Biosecurity Plant Quarantine Containment, Test Facilities and Research Greenhouses. Talk to the team at Winter Gardenz to discuss a tailored solution that will suit your requirements and provide years of trouble free service.
