

Cleaning and Maintenance

WARNING: Always unplug the unit prior to cleaning! Clean with a damp soft cloth. A non abrasive cleaning agent may be used for stubborn stains. Make sure no liquid enters the base of the unit.

The unit has been designed for use by people with special needs, however this does NOT mean it is unbreakable. You must ensure the unit is not hit with anything and that no one pulls or pushes the unit.

Lamp Change

Not required! It uses an LED which lasts for years!

Please note: the maximum ambient room temperature in which this unit will operate manually is 27 degrees C

Troubleshooting

Q. The unit doesn't work.

A1. Is it switched on? If so,

A2. Has the unit scrolled through its colors? If so,

A3. Please contact us for further assistance.

- Low voltage – transformer supplied
- Low maintenance
- Durable & Easy to use
- Study desktop stand
- Floor, wall or ceiling mountable
- Works with all standard accessories
- Designed for all ages and abilities
- 1 Year manufacturer's guarantee

Pack contents

- 1 x Aurora LED Projector
- 1 x Low Voltage Transformer

Getting Started

1. Place the Aurora LED Projector on a flat solid surface or mount securely on a wall.
2. Connect the low voltage transformer connector to the socket on the back of the unit (right)..
3. Connect the standard 110V AC plug to a nearby outlet.
4. The unit will now illuminate.

Fitting a Wheel Rotator & Effects Wheel

To enable images to be projected from the unit you will need to fit a wheel rotator and effects wheel – this is easily done.

1. First, locate your wheel rotator and choose the effect wheel you wish to use.
2. Remove both items from packaging. You will notice that on the front of the wheel rotator there is a metal spindle. On back of the effects wheel there is a plastic receptacle in the center of the wheel. Push the receptacle onto the metal spindle.
3. Looking at the projector you will see a slot towards the front of the unit. In here you will see 2 gates:
4. Slide the wheel rotator into the gate nearest the back of the projector and connect the plug to the socket underneath.
4. Switch the unit on. The wheel should now rotate.
5. If the image that is being projected is blurred then simply adjust the black focusing lens on the front until it becomes clear.

If you are still not sure then visit our website at www.experiainnovations.co.uk and look in the Projector section or visit our YOUTUBE channel – ExperialInnovations.

Please note: Only use the transformer supplied. Use of a different transformer may result in damage to the product and void the warranty. For warranty information please see separate warranty card supplied.
