[Male UltraCore is designed to give men massive growth via potent, premium ingredients. See Massive Results. Add size, growth and hardness to your bedroom performance.](#)

Dianabol (Methandrostenolone), also known as dbol, is chemically very similar to testosterone. It is an oral steroid that was developed specifically for performance enhancement. Usually, dianabol is most commonly ran as a kick start (the first 4-6 weeks) to a cycle but some choose to run it as a standalone. Dianabol is a Testosterone derived anabolic steroid that is 17CAA methylated for oral consumption. It is one of the only anabolic compounds in the world that was created solely for performance enhancement.

Dianabol is the testosterone hormone with an added double bond at the carbon one and two position. This slight alteration reduces the hormone's androgenic nature. It also carries an added methyl group at the 17 th carbon position that allows the hormone to survive oral ingestion, officially classifying Dianabol as a C17-alpha alkylated steroid. <https://gps.comesa.int/groups/sustanon-250-mg-kaufen-ohne-rezept-1-vial-hilma-biocare-b6synzdqk>
