

Safety Data Sheet

1. Product Name:	Resiloc PM – Base Component Classified as Hazardous
Identification	

Company Name	Aitken Freeman Pty Ltd	
Address	Unit 7, 7 – 9 Brough St. Sp	ringvale Vic 3171
Contact:	Ph. (03) 9701 3955	Fx. (03) 9701 3956

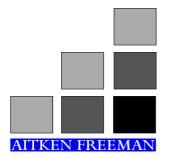

2. Hazard Identification:

GHS Classification	Skin corrosion/irritation - Category 2 Skin sensitisation - Sub-category 1B Acute aquatic toxicity - Category 2 Chronic aquatic toxicity - Category 2
Signal Word Hazard Statement	Hazard Causes skin irritation. May cause an allergic skin reaction. Toxic to aquatic life with long lasting effects.
Pictogram(s)	Exclamation mark, Environmental

Precautionary Statements

Prevention	Read label before use. Avoid breathing dust/fume/gas/mist/vapours/spray. Wash skin thoroughly after handling. Contaminated work clothing should not be allowed out of the work place. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection.
Response	Collect spillage. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF ON SKIN:Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash before re-use.
Disposal	Dispose of contents/container to approved waste disposal plant

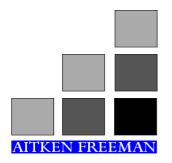

3. Composition / information on ingredients

Ingredients	Name Propane, 2,2-bis[p-(2,3- epoxypropoxy)phenyl]- polymers	CAS 25085-99-8	Proportion 30 - 60%
	Diglycidyl ether of phenol - formaldhyde polymer	28064-14-4	1 – 10%
	C12 – C14 glycidyl ether Ingredients determined to be	68609-97-2 non bazardous	1 – 10% Balance
4. First Aid Measur	0		Dulunoc

Inhalation	If inhaled, remove affected person from contaminated area. Keep at rest until recovered. If symptoms persist seek medical attention.
Ingestion	Do not induce vomiting. Wash out mouth thoroughly with water. Seek medical attention.
Skin	Wash affected area thoroughly with soap and water. Remove contaminated clothing and wash before re-use or discard. Seek medical attention.
Eye contact	If in eyes, hold eyelids apart and flush the eyes continuously with running water. Continue flushing for several minutes until all contaminants are washed out completely. Seek medical attention.
First Aid Facilities	Eye wash, safety shower and normal washroom facilities.
Advice to Doctor	Treat symptomatically.
Other information	For advice in an emergency, contact a Poisons Information Centre, 13 11 26, or a doctor at once.

5. Fire fighting measures

Suitable Extinguishing media	Use carbon dioxide, dry chemical, foam or water mist.
Unsuitable Extinguishing media	DO NOT use water jets.
Hazards from Combustion Products	Under fire conditions this product may emit toxic/irritating fumes including carbon monoxide and carbon dioxide.
Specific Hazards arising from the ingredients	Combustible liquid. This product will readily burn under fire conditions.
Hazchem Code	3Z

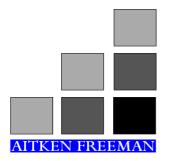

Precautions in connection with fire Fire fighters should wear full protective clothing and self contained breathing apparatus operated in positive pressure mode. Water spray may be used to keep fire exposed containers cool.

6. Accidental Release Measures

Emergency Procedures Wear appropriate personal protective equipment and clothing to prevent exposure. Extinguish or remove all sources of ignition and stop leak if safe to do so. Increase ventilation. Place inert absorbent, non-combustible material on to spillage. Use clean non sparking tools to collect the material and place into suitable labelled containers for subsequent recycling or disposal. Dispose of waste according to the applicable local and national regulations. If contamination of sewers or waterways occurs, inform the local water and waste management authorities in accordance with local regulations.

7. Handling and storage

Precautions for safe Handling Conditions for safe storage, including any Incompatibilities	Use only in a well ventilated area. Keep containers sealed when not in use. Prevent the build up of mists or vapours in the work atmosphere. Avoid inhalation of vapours and mists, and skin or eye contact. Do not use near ignition sources. Do not pressurise, cut, heat or weld containers as they may contain hazardous residues. Maintain high standards or personal hygiene. ie. Washing hands prior to eating, drinking, smoking or using toilet facilities. Store in a cool, dry, well ventilated area away from heat, sources of ignition, oxidising agents, food stuffs, and clothing, and out of direct sunlight. Keep containers closed when not in use and securely sealed and protected against physical damage. Inspect regularly for deficiencies such as damage or leaks. Co not pressurise, cut, heat, or weld containers as they may contain hazardous residues. For information on the design of the store room, reference should be made to Australian Standard AS1940 – The storage of flammable and combustible liquids. Reference should also be made to all state and federal regulations.
8. Exposure Control Occupational exposure limit values Biological limit values Appropriate engineering controls	S No exposure standards have been established for this material by Safework Australia. However as with all chemicals, exposure should be kept to the lowest possible levels. No biological limit allocated Use with good ventilation. If mists or vapours are produced, local exhaust ventilation should be used.
Respiratory protection	If engineering controls are not effective in controlling airbourne exposure then an approved respirator with a replaceable organic vapour filter should be used.

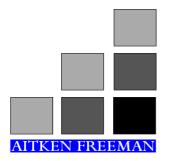

Eye Protection	Safety glasses with side shields or chemical goggles should be worn. Final choice of appropriate eye/face protection will vary according to individual circumstances. Eye protection devices should conform with Australiann Standard AS 1337 – Eye Protectors for Industrial Applications.
Hand Protection	Wear gloves of impervious material. Final choice of appropriate gloves will vary with individual circumstances ie methods of handling or according to risk assessments undertaken. Reference should be made to AS2161.1 Occupational protective gloves – Selection, Use, and Maintenance.
Body Protection	Suitable protective work wear, EG Cotton overalls buttoned at the neck and wrist is recommended. Chemical resistant apron is recommended where large quantities are handled.

9. Physical and Chemical Properties

Not Applicable	Form: Solubility: Specific Gravity (20°C): Relative Vapour Density (air=1): Vapour Pressure (kPa @ 20°C): Flash Point (°C): Flammability Limits (%): Autoignition Temperature (°C): % Volatile by Volume: Melting Point/Range (°C): Boiling Point/Range (°C): pH: Viscosity:	Off white, soft paste Not miscible with water 1.3 – 1.5 >1 Not Available > 150°C Not Applicable 400°C Not Applicable Not Available Not Available Neutral Not Applicable
----------------	--	---

10 Stability and Reactivity

Chemical Stability	Unstable in the presence of incompatible materials See below
Possibility of Hazardous Reactions	may polymerise in contact with heat, organic and inorganic free radical producing initiators
	may polymerise with evolution of heat in contact with oxidisers, strong acids, bases and amines
	may react violently with strong oxidisers, permanganates, peroxides, acyl halides, alkalis, ammonium persulfate, bromine dioxide
	may attack some forms of plastics, coatings, and rubber
	Avoid reaction with oxidising agents
Conditions to Avoid	Contact with any of the above
Hazardous Decomposition Products	Carbon monoxide

11 Toxicological Information

Inhaled	The material can cause respiratory irritation in some persons. The body's response to such irritation can cause further lung damage. Not normally a hazard due to non-volatile nature of product
Ingestion	High molecular weight material; on single acute exposure would be expected to pass through gastrointestinal tract with little change / absorption.
Skin Contact	The material may cause moderate inflammation of the skin either following direct contact or after a delay of some time. Repeated exposure can cause contact dermatitis which is characterised by redness, swelling and blistering. Open cuts, abraded or irritated skin should not be exposed to this material
Eye	May produce eye irritation in some persons and produce eye damage
Chronic	Long-term exposure to respiratory irritants may result in disease of the airways involving difficult breathing and related systemic problems. Skin contact with the material is more likely to cause a sensitisation reaction in some persons compared to the general population. Toxic: danger of serious damage to health by prolonged exposure through inhalation.
Toxicity	Not available

12 Ecological Information

Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Do NOT allow product to come in contact with surface waters or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment

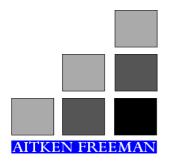

wash-waters.

Wastes resulting from use of the product must be disposed of on site or at approved waste sites. Significant environmental findings are limited. Oxiranes (including glycidyl ethers and alkyl oxides, and epoxides) exhibit common characteristics with respect to environmental fate and

ecotoxicology.

13 Disposal Considerations

Product / Packaging	Containers may still present a chemical hazard/ danger when empty.
Disposal	Legislation addressing waste disposal requirements may differ by state and/ or
	territory. Each user must refer to laws operating in their area.
	This material may be recycled if unused, or if it has not been contaminated so as to make it unsuitable for its intended use.
	DO NOT allow wash water from cleaning or process equipment to enter drains.
	It may be necessary to collect all wash water for treatment before disposal.
	In all cases disposal to sewer may be subject to local laws and regulations and these
	should be considered first.
	Where in doubt contact the responsible authority.
	Recycle wherever possible or consult manufacturer for recycling options.
	Consult State Land Waste Authority for disposal.
	Bury or incinerate residue at an approved site.
	Recycle containers if possible, or dispose of in an authorised landfill.

Signal Word	Danger
Hazard Statement	

Harmful in contact with skin.

Harmful if swallowed.

May cause an allergic skin reaction.

Causes severe skin burns and eye damage.

Harmful to aquatic life.

Harmful to aquatic life with long lasting effects.

Precautionary Statements (Prevention):

P280 Wear protective gloves/clothing/eye protection/face protection

P260 Do not breathe dust or mist.

P273 Avoid release to the environment.

- P272 Contaminated work clothing should not be allowed out of the workplace.
- P270 Do not eat, drink or smoke when using this product.
- P264 Wash with plenty of water and soap thoroughly after handling

Precautionary Statements (Response):

P310 Immediately call a POISON CENTER or doctor/physician.

P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact
	lenses, if present and easy to do. Continue rinsing.

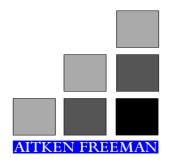

P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower

- P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P301 + P330 + P331 IF SWALLOWED: rinse mouth. Do NOT induce vomiting.
- P301 + P330 + P331 IF SWALLOWED: rinse mouth. Do NOT induce vomiting.

```
P361 + P364 Take off immediately all contaminated clothing and wash it before reuse.
```

Precautionary Statements (Storage):

P405 Store locked up.

3. Composition / information on ingredients

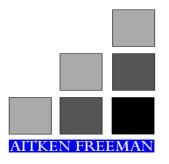

Ingredients Name	CAS	Proportion
Polyether amine Triethylene tetramine Ingredients determined to be non hazardous	2855-13-2 112-24-3	30 – 60 % 1 – 10 % Balance

4. First Aid Measures

Inhalation	If inhaled, remove affected person from contaminated area. Keep at rest until recovered. If symptoms persist seek medical attention.
Ingestion	Do not induce vomiting. Wash out mouth thoroughly with water. Seek medical attention.
Skin	Wash affected area thoroughly with soap and water. Remove contaminated clothing and wash before re-use or discard. Seek medical attention.
Eye contact	If in eyes, hold eyelids apart and flush the eyes continuously with running water. Continue flushing for several minutes until all contaminants are washed out completely. Seek medical attention.
First Aid Facilities Advice to Doctor	Eye wash, safety shower and normal washroom facilities. Treat symptomatically.
Other information	For advice in an emergency, contact a Poisons Information Centre, 13 11 26, or a doctor at once.

5. Fire fighting measures

Suitable Extinguishing media	Use carbon dioxide, dry chemical, alcohol resistant foam, or water mist.
Unsuitable Extinguishing media	DO NOT use water jets.
Hazards from Combustion Products	Under fire conditions this product may emit toxic/irritating fumes including carbon monoxide, carbon dioxide and oxides of nitrogen.
Specific Hazards arising from the ingredients	Combustible liquid. This product will readily burn under fire conditions.

Hazchem Code

Precautions in connection with fire

Fire fighters should wear full protective clothing and self contained breathing apparatus operated in positive pressure mode. Water spray may be used to keep fire exposed containers cool.

6. Accidental Release Measures

•3Z

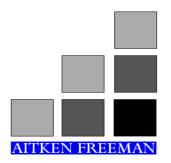

Emergency
ProceduresWear appropriate personal protective equipment and clothing to prevent
exposure. Extinguish or remove all sources of ignition and stop leak if safe
to do so. Increase ventilation. Place inert absorbent, non-combustible material
on to spillage. Use clean non sparking tools to collect the material and place into
suitable labelled containers for subsequent recycling or disposal.
Dispose of waste according to the applicable local and national regulations.
If contamination of sewers or waterways occurs, inform the local water and
waste management authorities in accordance with local regulations.

7. Handling and storage

Precautions for safe	Use only in a well ventilated area. Keep containers sealed when not in use.
Handling	Prevent the build up of mists or vapours in the work atmosphere. Avoid inhalation
	of vapours and mists, and skin or eye contact. Do not use near ignition sources.
	Do not pressurise, cut, heat or weld containers as they may contain hazardous
	residues. Maintain high standards or personal hygiene. ie. Washing hands prior to
	eating, drinking, smoking or using toilet facilities.
Conditions for safe	Store in a cool, dry, well ventilated area away from heat, sources of ignition,
storage, including any	oxidising agents, food stuffs, and clothing, and out of direct sunlight.
Incompatibilities	Keep containers closed when not in use and securely sealed and protected against
	physical damage. Inspect regularly for deficiencies such as damage or leaks.
	Co not pressurise, cut, heat, or weld containers as they may contain hazardous
	residues. For information on the design of the store room, reference should be
	made to Australian Standard AS1940 – The storage of flammable and combustible
	liquids. Reference should also be made to all state and federal regulations.

8. Exposure Controls

or Exposure contro	15
Occupational	No exposure standards have been established for this material by Safework
exposure limit values	Australia. However as with all chemicals, exposure should be kept to the lowest possible levels.
Biological limit values	No biological limit allocated
Appropriate	Use with good ventilation. If mists or vapours are produced, local exhaust
engineering controls	ventilation should be used.
····j·······j······	
Respiratory	If engineering controls are not effective in controlling airbourne exposure then an
protection	approved respirator with a replaceable organic vapour filter should be used.
	Reference should be made to Australian standards AS 1715, Selection, Use, and
	Maintenance of Respiratoy Protective Devices, in order to make any necessary
	changes for individual circumstances.
Eye Protection	Safety glasses with side shields or chemical goggles should be worn. Final choice
	of appropriate eye/face protection will vary according to individual circumstances.
	Eye protection devices should conform with Australiann Standard AS 1337 – Eye
	Protectors for Industrial Applications.

Hand Protection	Wear gloves of impervious material. Final choice of appropriate gloves will vary with individual circumstances ie methods of handling or according to risk
	assessments undertaken. Reference should be made to AS2161.1 Occupational protective gloves – Selection, Use, and Maintenance.
Body Protection	Suitable protective work wear, EG Cotton overalls buttoned at the neck and wrist is recommended. Chemical resistant apron is recommended where large quantities are handled.

9. Physical and Chemical Properties

Form: Solubility: Specific Gravity (20°C): Relative Vapour Density (air=1): Vapour Pressure (kPa @ 20°C): Flash Point (°C): Flammability Limits (%): Autoignition Temperature (°C): % Volatile by Volume: Melting Point/Range (°C): Boiling Point/Range (°C): pH: Viscosity: Soft black paste Not miscible with water 0.96 – 0.98 Not Available > 96°C Not Applicable Not Available Not Available Not Available Not Available Not Available Neutral Not Applicable

10 Stability and Reactivity

Possibility of hazardous reactions

The product is chemically stable. Exothermic reaction. Reacts with acids.

Conditions to avoid

Avoid all sources of ignition: heat, sparks, open flame. See MSDS section 7 - Handling and storage. **Incompatible materials** Strong oxidizing agents, acids, halogenated compounds.

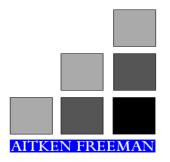

Hazardous decomposition products

Decomposition products:

Hazardous decomposition products: carbon monoxide, carbon dioxide, nitrogen oxides

11 Toxicological Information

Inhaled	The material can cause respiratory irritation in some persons. The body's response to such irritation can cause further lung damage. Not normally a hazard due to non-volatile nature of product
Ingestion	High molecular weight material; on single acute exposure would be expected to pass through gastrointestinal tract with little change / absorption.
Skin Contact	The material may cause moderate inflammation of the skin either following direct contact or after a delay of some time. Repeated exposure can cause contact dermatitis which is characterised by redness, swelling and blistering. Open cuts, abraded or irritated skin should not be exposed to this material
Еуе	May produce eye irritation in some persons and produce eye damage

Chronic

Long-term exposure to respiratory irritants may result in disease of the airways involving difficult breathing and related systemic problems. Skin contact with the material is more likely to cause a sensitisation reaction in some persons compared to the general population. Toxic: danger of serious damage to health by prolonged exposure through inhalation. Not available

Toxicity

12 Ecological Information

Persistence and degradability No further relevant information available. Behaviour in environmental systems: Bioaccumulative potential No further relevant information available. Mobility in soil No further relevant information available. Ecotoxical effects: Not determined Remark: Toxic for fish

13 Disposal Considerations

Product / Packaging Containers may still present a chemical hazard/ danger when empty. Disposal Legislation addressing waste disposal requirements may differ by state and/ or territory. Each user must refer to laws operating in their area. This material may be recycled if unused, or if it has not been contaminated so as to make it unsuitable for its intended use. DO NOT allow wash water from cleaning or process equipment to enter drains. It may be necessary to collect all wash water for treatment before disposal. In all cases disposal to sewer may be subject to local laws and regulations and these should be considered first. Where in doubt contact the responsible authority. Recycle wherever possible or consult manufacturer for recycling options. Consult State Land Waste Authority for disposal. Bury or incinerate residue at an approved site. Recycle containers if possible, or dispose of in an authorised landfill.

15 Regulatory Information

· Safety, health and environmental regulations/legislation specific for the substance or mixture

Standard for the Uniform Scheduling of Medicines and Poisons

None of the ingredients is listed.

· GHS label elements

The product is classified and labelled according to the Globally Harmonised System (GHS).

· Hazard pictograms

GHS05 GHS07 GHS08

· Signal word Danger

· Hazard-determining components of labelling:

· Hazard statements

Harmful if swallowed.

Harmful if inhaled.

Causes severe skin burns and eye damage.

May cause an allergic skin reaction.

Suspected of damaging fertility or the unborn child.

· Precautionary statements

Do not breathe dusts or mists.

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Immediately call a POISON CENTER/doctor.

Store locked up.

Dispose of contents/container in accordance with local/regional/national/international regulations.

· Directive 2012/18/EU

· Named dangerous substances - ANNEX I None of the ingredients is listed.

· Seveso category E1 Hazardous to the Aquatic Environment
