16 to 29 inch wheels

9mm wheel axle  
(100 & 110mm fork wheelbase)

12mm and 15mm wheel axle  
(100 & 110mm fork wheelbase adapter  
required)

\*Items not compatible with the AddBike+

To check the compatibility of the AddBike+ with your bike, please consult first our Compatibility List on:

### Compatibility List

**Measure the fork wheelbase**  
(The width of the space in between the fork legs)

**Measure the diameter of the thru-axle**  
The thru-axle is in the center of the wheel, a threaded rod that allows to fix the wheel to the bike

### After your measurement, if...

The fork spacing is 75 mm

**THEN**  
you'll need

**AddBike+ Adapter Kit 16" to 20"**

The fork spacing is 100 mm or 110 mm

If the diameter of thru-axle is 9mm and you have

Quick release

OR

Nut

**THEN**

You're good to go

If the diameter of the thru-axle is 12mm and you have

Quick release

OR

Thru-axle

**THEN**  
you'll need

**Adapter Kit 12mm**

If the diameter of the thru-axle is 15mm and you have

Quick release

OR

Thru-axle

**THEN**  
you'll need

**Adapter Kit 15mm**

The thru-axle is bigger than 110 mm
