

# Ring Sizer Guide

PRINT TO SCALE

Before measuring your ring size, make sure you have printed this guide on size A4 paper and scaled to 100%. To check the accuracy of your printout, measure the line below. The scale is correct, if the gold line measures at 10cm.

1. Once you have ensured the scaling is accurate, cut out the ring sizer above using a pair of scissors.
2. Make a horizontal slit along the dotted line, where indicated on the ring sizer.
3. Wrap the ring sizer around your finger, with the text facing outwards. Pass the end through the horizontal slit and pull until it fits comfortably around your finger. Make sure you can remove the sizer over your knuckle.
4. The letter, that lines up with the edge of the tape, is your ring size.
5. Be careful not to pull too tightly as this will give an inaccurate size.

Please note this is a guide only and if in any doubt before buying a ring, please consult us.
