GRADY KLEIN

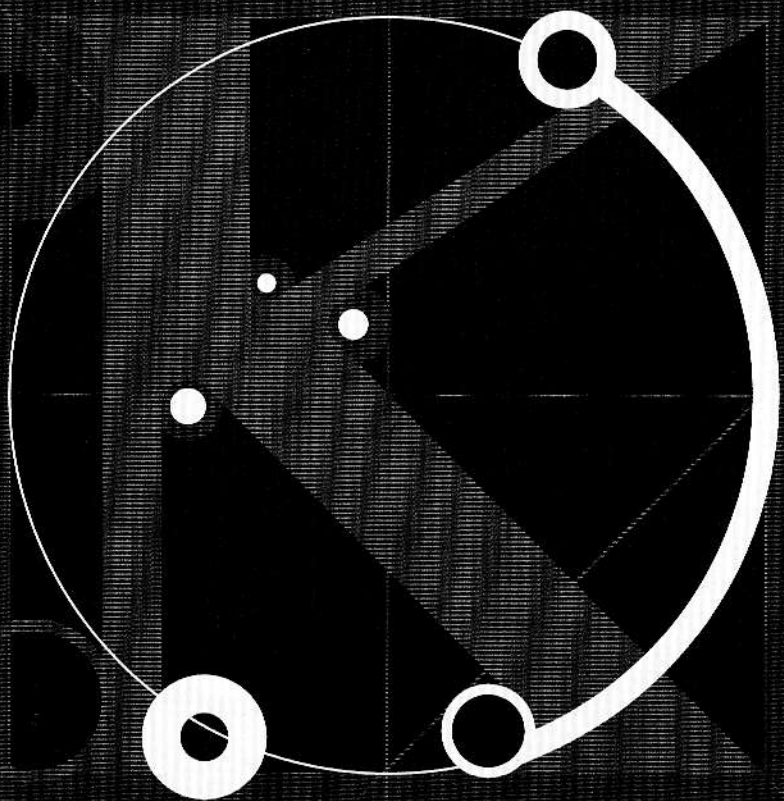

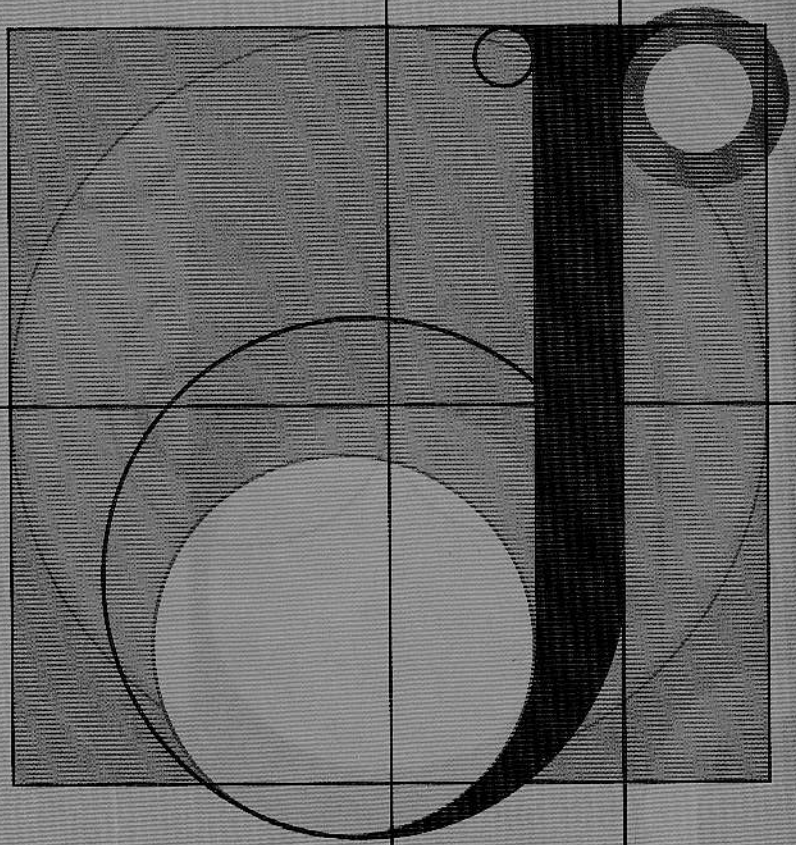

ALPHABET  
BOOK

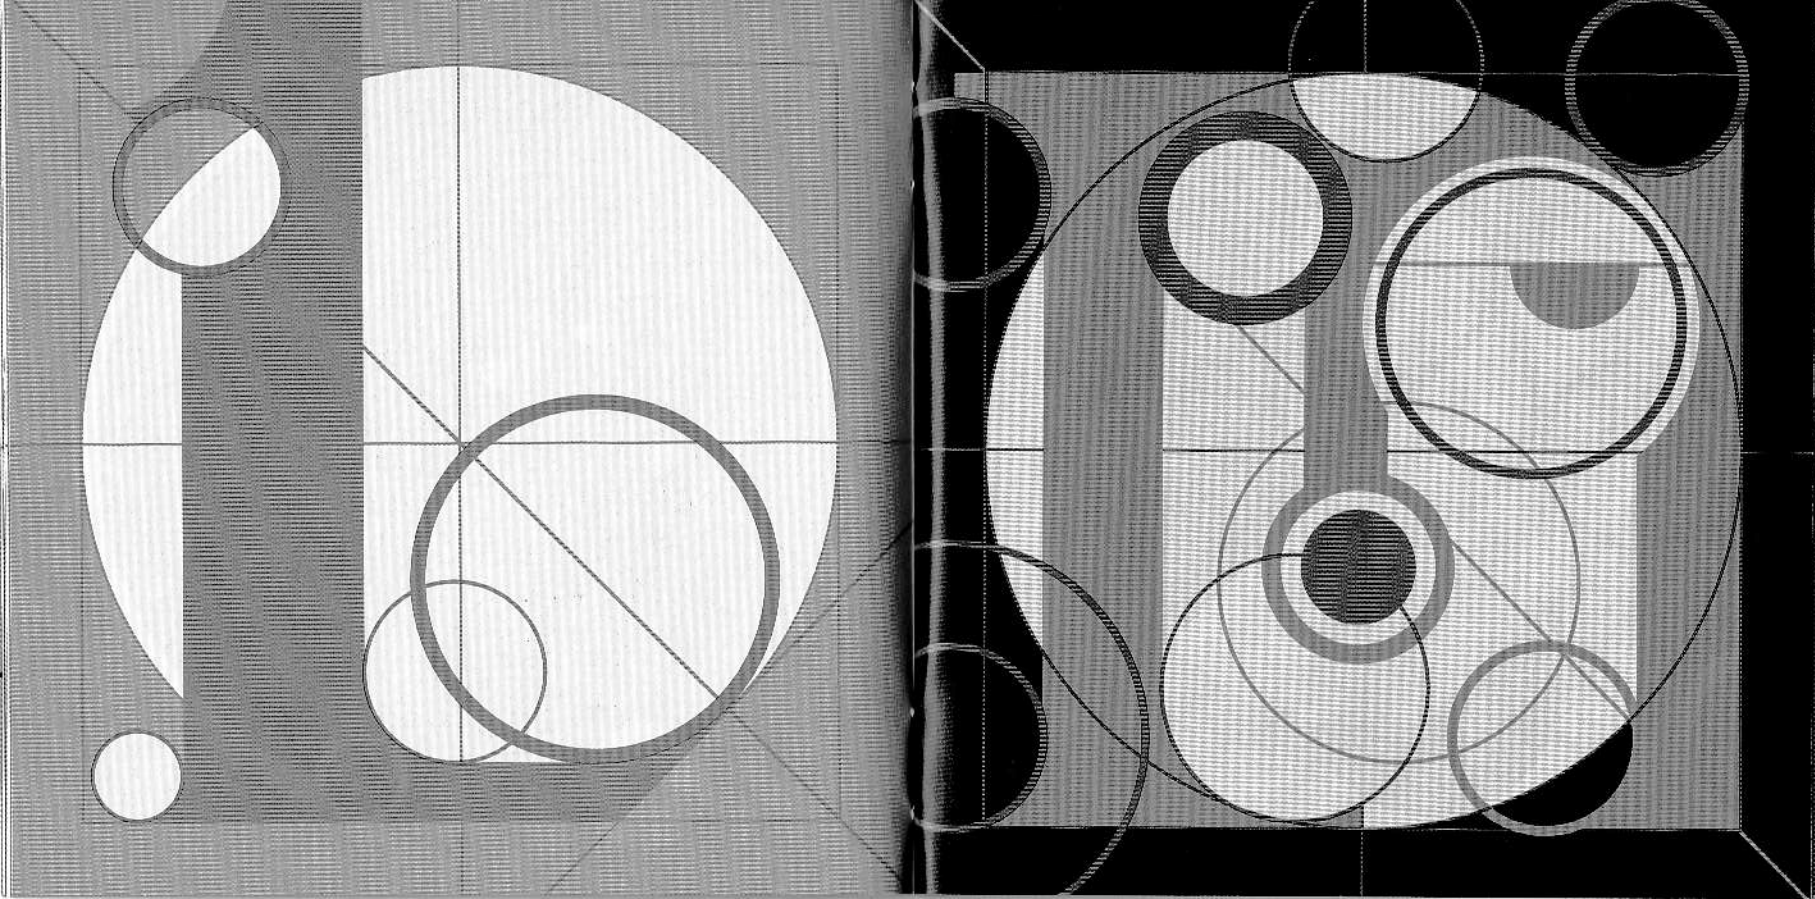

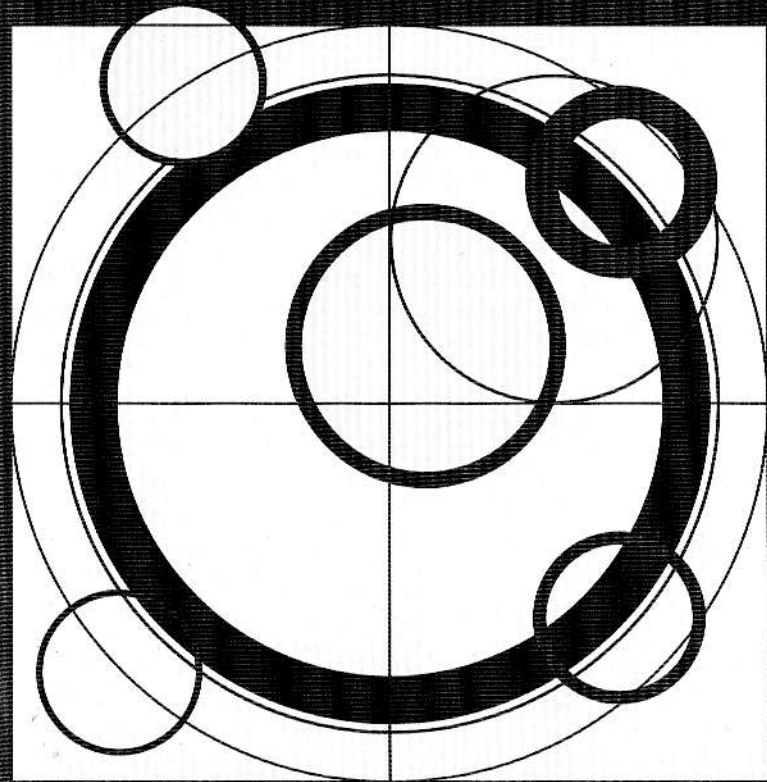

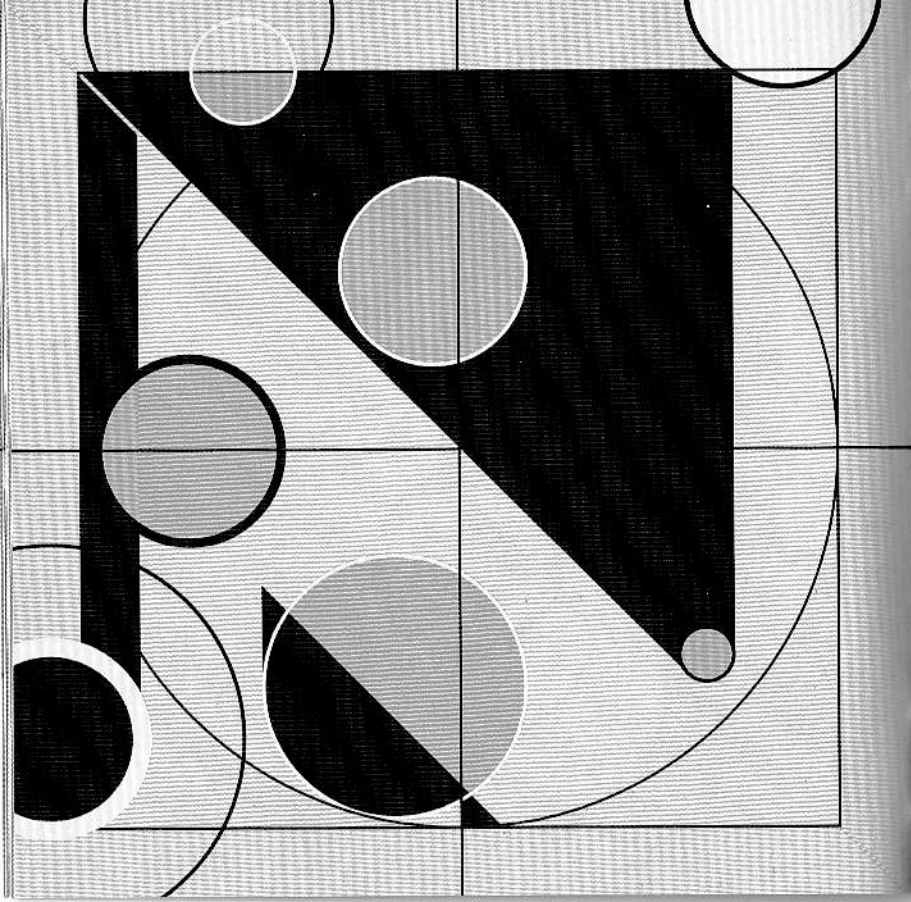

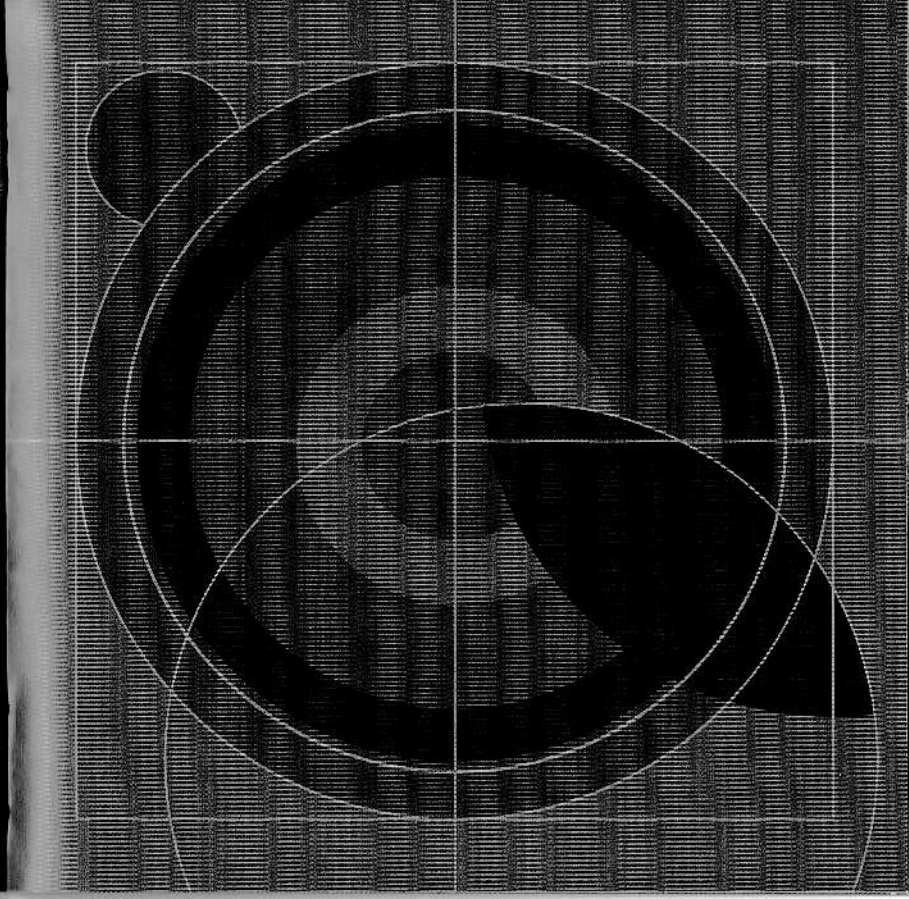

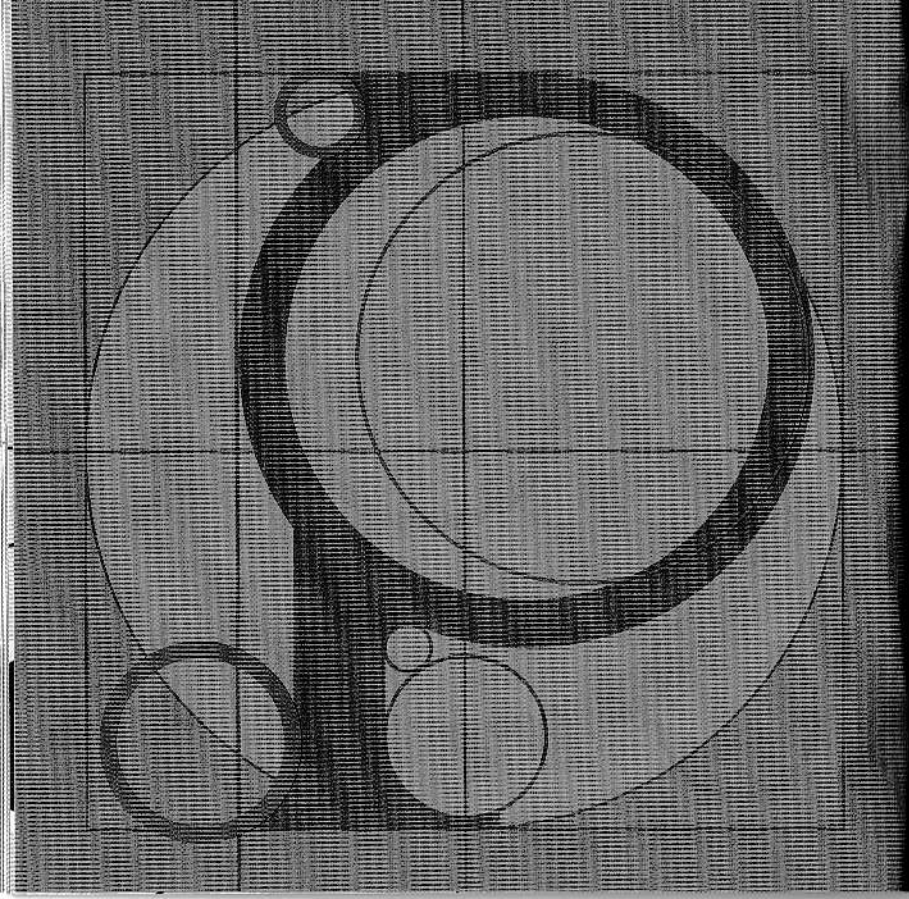

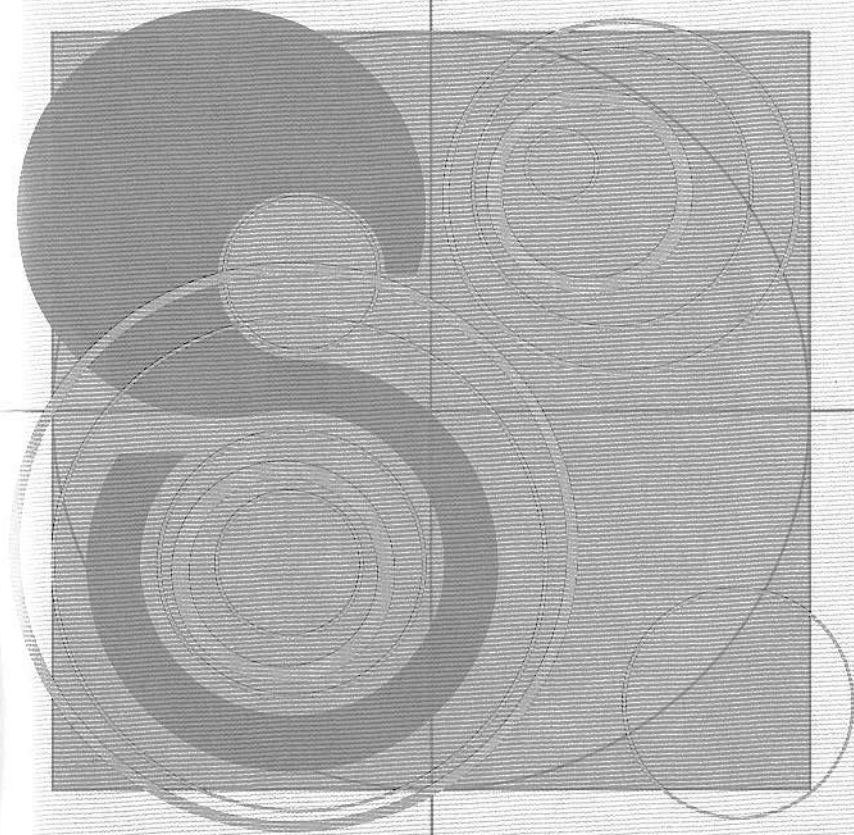

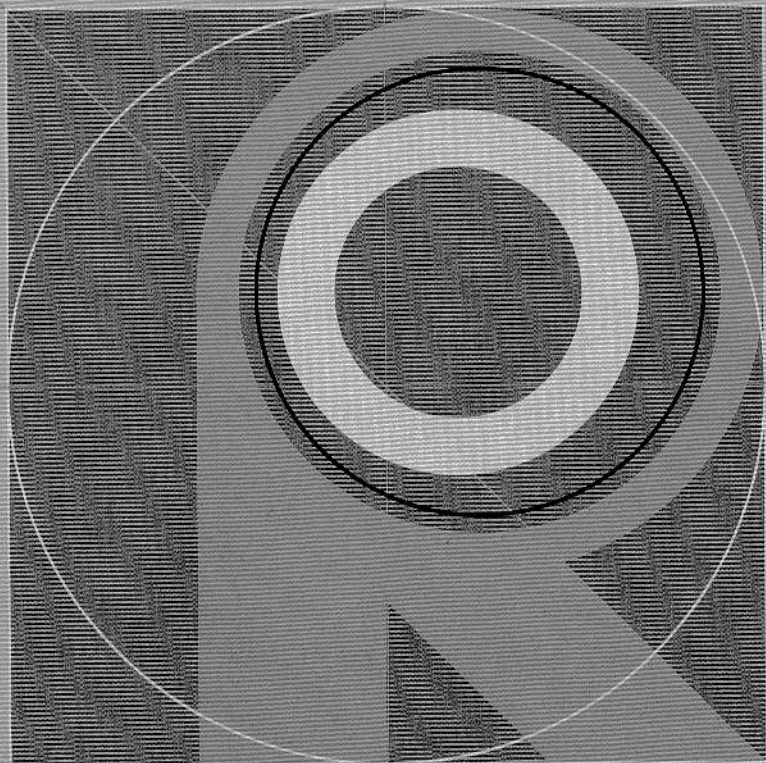

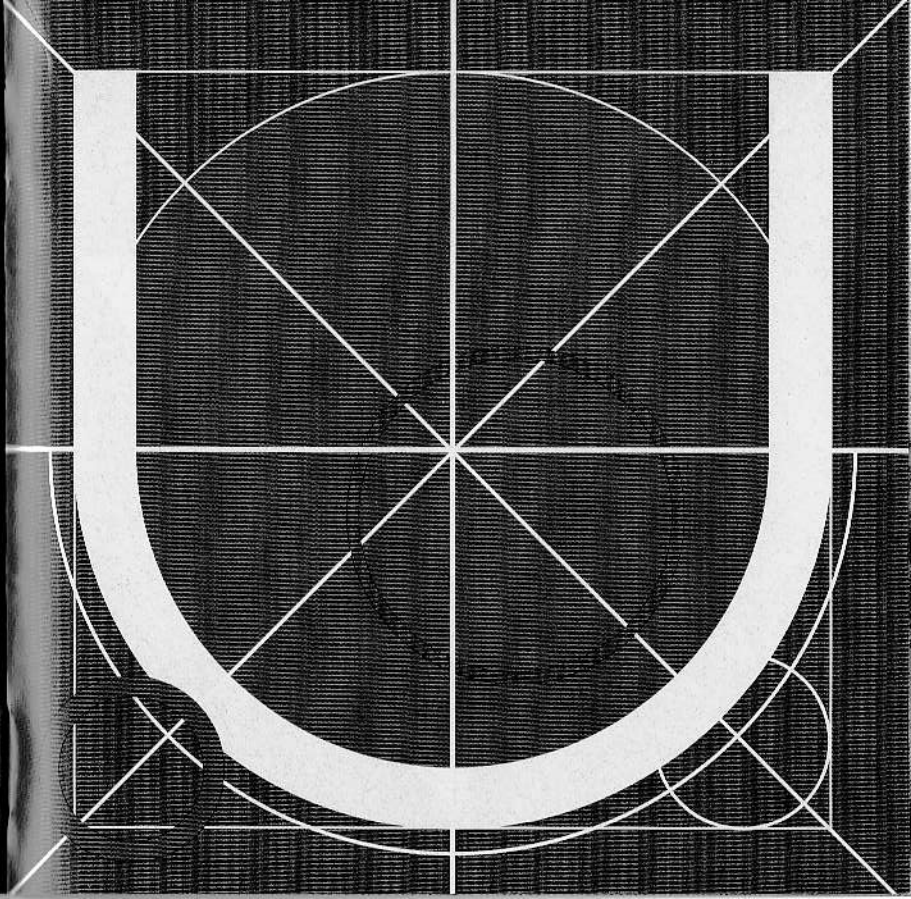

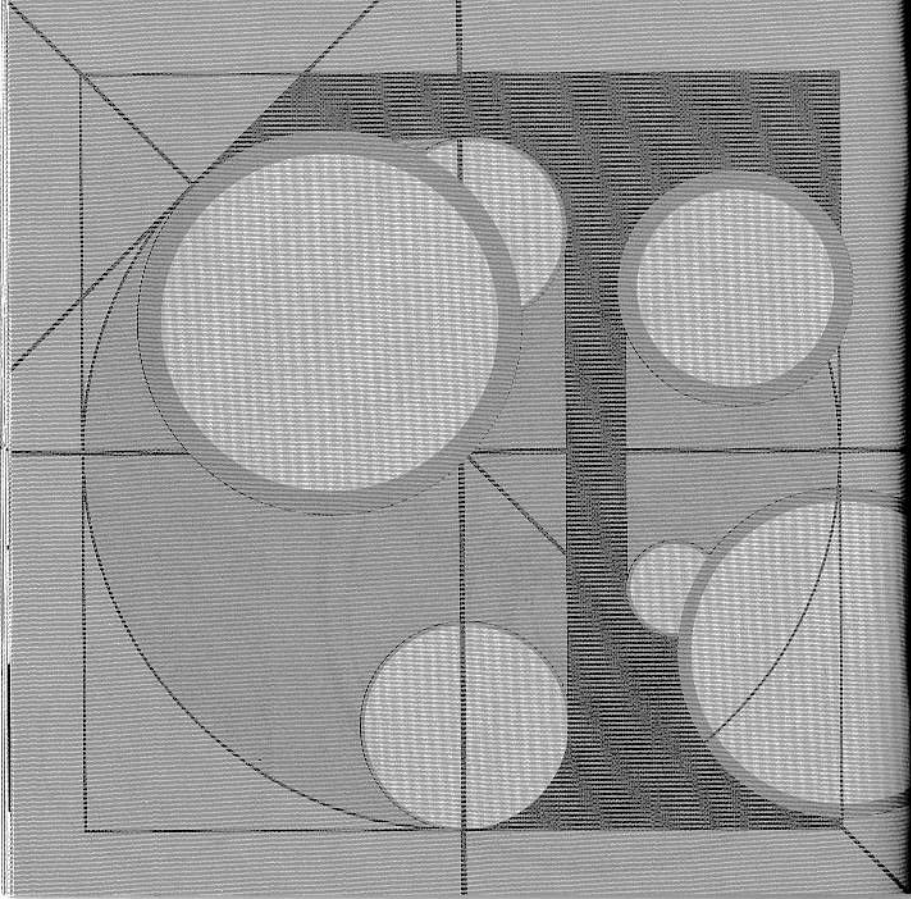

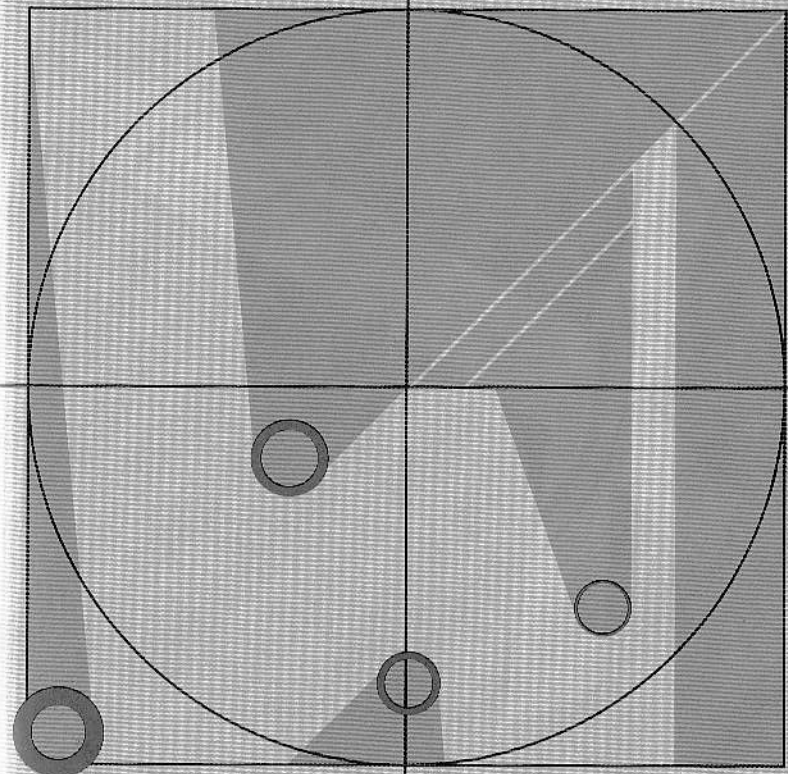

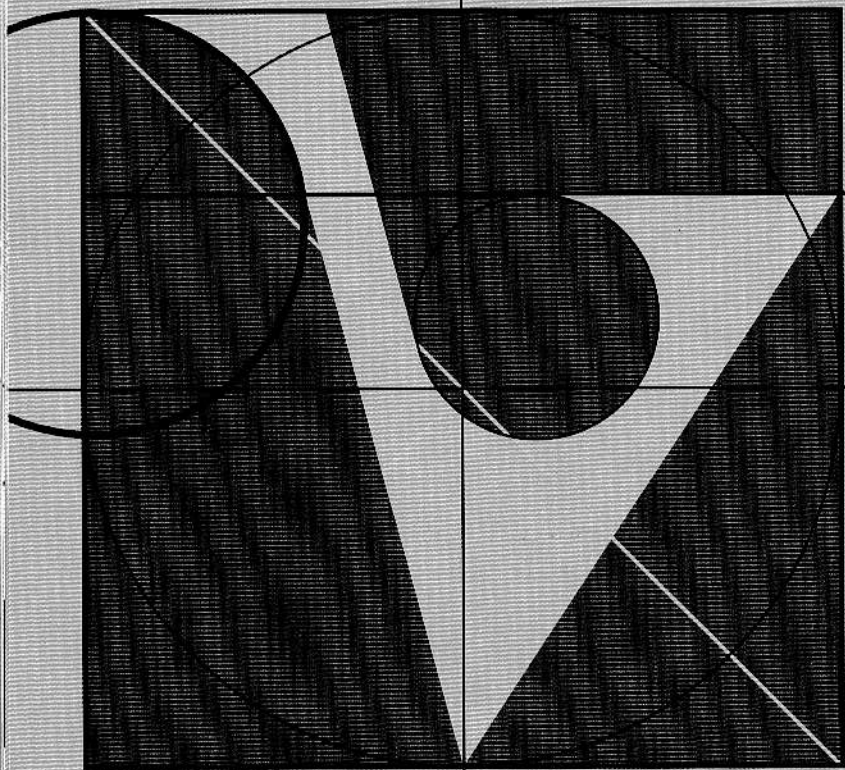

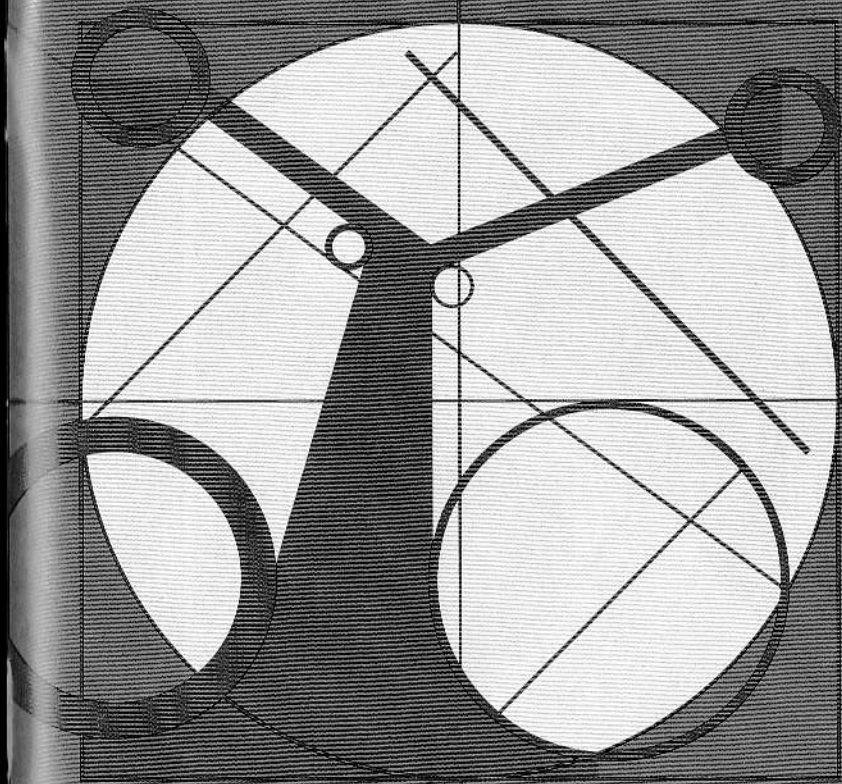

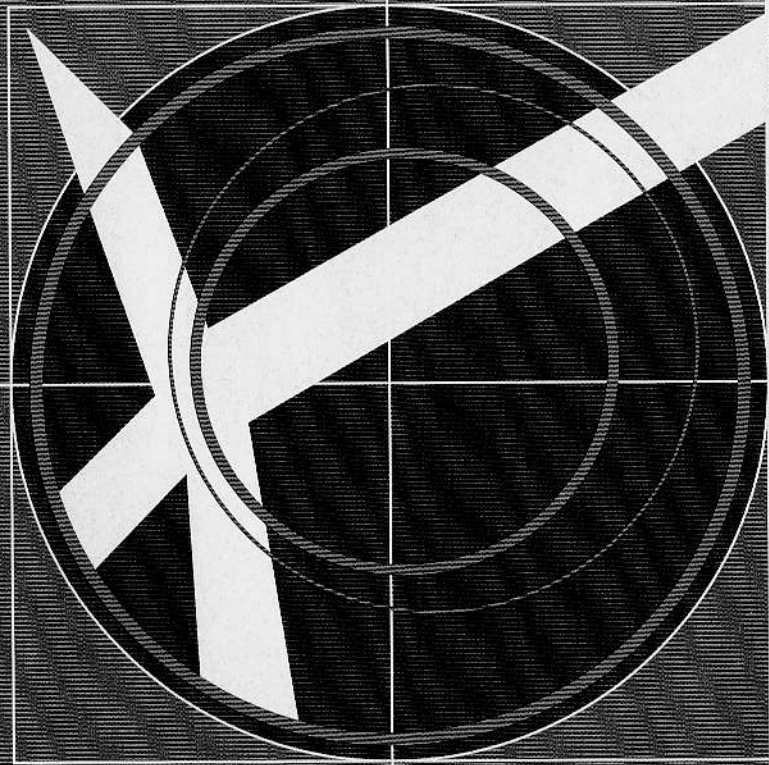

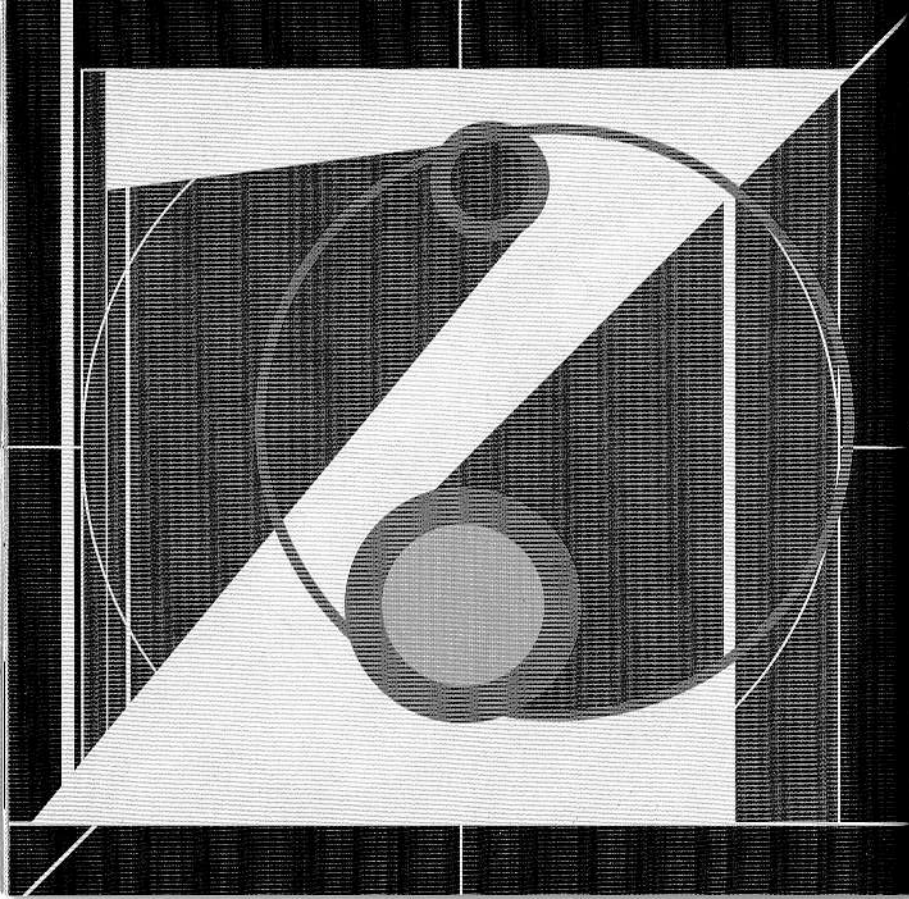

The inspiration for this set of pieces came from the children's television show, *Sesame Street*, where the unadulterated (pun intended) celebration of letters and numbers, those atoms of daily life, is often clothed in lively musical garb. In a few of the pieces on this CD numbers and letters have deeper meaning, but in most they celebrate nothing but themselves. The images of *Sesame Street* inspired me to ask Grady Klein to animate some of the music, and his work is included on the enhanced portion of the CD. Just pop the disc into your PC or Mac to view (for other platforms use the Flash .swf files with a Flash-enabled web browser), and doubleclick on the appropriate folder to find the animations. (In Windows XP, don't double-click on the CD icon, instead select it and use File menu/open to reach the folder.) Grady's *Alphabet Book* included in this CD booklet is based on his animations for ABC, inspired by Albrecht Durer's *Of the Just Shaping of Letters*. All the music on the CD was created on an iMac using the *SuperCollider* synthesis language. The animations were built with *Macromedia Flash*. For more information on either of us visit:
