Remove storage cap or teat prior to assembling the bottle.

Step 2

Simply push the bottle body into the base (do not attempt to twist shut).

PUSH ALL THE WAY IN

CLEANING AND STERILIZATION

ISIZULU

Before each use, clean the product by immersing in boiling water for at least 5 minutes. Always clean immediately after use. To clean, place in a dishwasher (top rack only) or use the nanobébé cleaning brush and hot soapy water. Rinse in clean water. Dishwasher safe - food colourings may discolour products. Do not use abrasive cleaning agents or anti-bacterial cleaners. Do not allow product to come into contact with oil-based foods since staining may result. Do not turn the teat inside out as this may result in damage. Do not insert any cleaning implements into the hole in the end of the teat nor in the teat vents since doing so may result in damage. Ngaphambi kokusebenzisa okokuqala, bulala amagciwane kumncumu (teat) ngokwenza okukodwa phakathi kokuwufaka emanzini abilayo imizuzu emi-5 noma ngokusebenzisa i-nanobébé Microwave Steam Steriliser. Ukwehluleka ukubulala amagciwane ngendlela efanele kungalimaza impilo yengane yakho.

ISIXHOSA

Phambi kokuba uyisebenzise, yicoce ngokuyifaka emanzini abilileyo ithuba elingange mizuzu emihlanu Icochwa rhoqo emveni kokuba isebenzile. Indlela yokuyicocha, yifake kumatshini wohlamba izitya (ngaphezulu kuphela) okanye usebenzise i- nanobébé brush kwakunye namanzi anesepha. Uyipure emanzini acocekileyo. Ikulungele ukuba kumatshini wohlamba izitya - ukutya okuthile kungayijika umbala. Ungasebenzini izibulali-ntsholongwane ezirhabaxa okanye ezinobuzaza. Ungavumeli ukuba idibane kunye nokunye ukutya okwenziwe nge-oli kuba ingashiya amabala. Ungaphethuli ngaphakathi nangaphandle ititi kuba ingamoshakala. Ungafaki zixhobo zokukhina emngxunyeni we-titi kuba xa usenza njalo ungenza umonakalo. Phambi koba uyisebenzise, bulala iintsholongwane kwi titi ngokuthi uyifake emanzini abilileyo imizuzu emihlanu okanye ngosebenzisa i-nanobébé Microwave Steam Sterilizer. Ukungayicoci ngokufanelekileyo kungabeka impilo yosana lwakho ebungciphekweni.

Preventing leaks

Make sure all edges are evenly aligned and flush tight.

Make sure all parts are **DRY AND OIL FREE**

Step 3

To disassemble pull down on the lip.

WARNING:

ENGLISH

Always use this product with adult supervision. Accidents have occurred when babies have been left alone with drinking equipment due to the baby falling or the product being disassembled. Always check food temperature before feeding by testing on a sensitive part of your skin, the back of your wrist for example. When using formula, follow the formula milk manufacturer's instructions and allow the freshly boiled water to cool before pouring into the bottle. Never use feeding teat as a pacifier. Continuous and prolonged sucking of fluids can cause tooth decay. Tooth decay in young children can occur even when non-sweetened fluids are used. This can occur if the baby is allowed to use the bottle for long periods through the day and particularly through the night, when saliva flow is reduced or if the bottle is used as a pacifier. Do not heat in microwave.

Warning:

If you are breastfeeding your baby, using a feeding bottle and teat may interfere with the baby's natural way of suckling your breast.

ISIZULU

Sebenzisa lo mkhiqizo ngaso sonke isikhathi ugaqwe umuntu omdala. Kwenzeka izingozi lapho kushiywe khona abantwana bodwa nensiza yokuphuza ngenxa yokuwa kwabantwana noma ukukhumuka komkhiqizo. Hlola ngaso sonke isikhathi izinga lokushisa lokudla ngaphambi kokupha umntwana ukudla ngokukuhlola endaweni ezwela kakhulu yesikhumba sakho, isibonelo ingemuva lesihlakala sakho. Uma usebenzisa ubisi lwabantwana oluyimpuphu, landela imiyalelo yomkhiqizi wobisi lwabantwana oluyimpuphu futhi uvumele ukuthi amanzi asanda kubiliswa aphole ngaphambi kokuthi uwathele ebhodleleni. Ungasebenzisi umncumu (teat) njengedami (pacifier). Ukubola kwamazinyo ezingane ezincane kungezeka noma ngabe kungasetshenziswa okuphuzwayo okunoshukela. Lokhu kungenzeka uma umntwana evunyelwa ukuthi asebenzise ibhodlela isikhathi eside osukwini futhi ikakhulukazi ebusuku, lapho ukuhamba kwamathe kwehlile noma uma ibhodlela lisetshenziswa njengedami (pacifier). Ungalifudumezi ku-microwave.

FOR YOUR CHILD'S SAFETY AND HEALTH

WARNING! Always use this product with adult supervision . • Never use feeding teat as a pacifier/soother. • Continuous and prolonged sucking of fluids will cause tooth decay. • Do not heat on the stovetop. Do not place in a heated oven. • Always check food temperature before feeding. • When using formula, follow the formula milk manufacturer's instructions and allow the freshly boiled water to cool before pouring into the bottle. • To ensure the bottle functions correctly and to prevent leakage, always ensure teat screw ring is tightly and evenly closed and bottle body is flush with bottle base. • Expressed breast milk can be stored in sterilized nanobébé bottles in the refrigerator up to 48 hours (not in the door) or the freezer for up to 3 months. Never refreeze breast milk or add fresh breast milk to already frozen milk. • Always wash your hands thoroughly and ensure surfaces are clean before contact with sterilized components. Do not place components directly on surfaces that have been cleaned with antibacterial cleaning agents.

Maintenance

Before each use, inspect all items. Pull the teat in all directions. Throw away at first signs of damage or weakness. • Do not leave a teat in direct sunlight or heat, or leave in disinfectant ("sterilizing solution") for longer than recommended, as this may weaken the teat. • Do not store with or allow to come into contact with solvents or harsh chemicals. • Keep all parts not in use out of reach of children. • For safety and hygiene reasons we recommend that the teat be replaced at least every 2 months. • Excessive concentration of detergents may eventually cause plastic components to crack. • To save storage space, stack* two or more nanobébé feeding bottles sealed with storage caps • If not in use for over a week, the nanobébé feeding bottle should be stored disassembled.

*Breast milk bottles only.

FLEXY PACIFIER/SOOTHER

Flexy Pacifier/Soother

Extra soft teat
Lightweight & ergonomic

- One piece silicone construction
- Teat specially designed to promote healthy oral development

Suitable for sterilization in the nanobébé Microwave Steam Sterilizer or boiling water for at least 5 minutes. After sterilization please allow teat to cool for at least 5 minutes and remove any trapped water before use. For your child's safety

For your child's safety WARNING! Do not tie pacifier/soother around child's neck as it presents

a strangulation danger. In the event the pacifier/soother becomes lodged in the mouth, DO NOT PANIC; it cannot be swallowed and is designed to cope with such an event. Remove from the mouth with care, as gently as possible. Always use this product under adult supervision. Do not leave a pacifier/soother in direct sunlight or near a source of heat, or leave in disinfectant (sterilizing solution) for longer than recommended, as this may weaken the teat. Never dip the teat in sweet substances or medication, your child may get tooth decay. Before first use, place in boiling water for 5 minutes (may cause slight color change), allow to cool and squeeze out any trapped water from the pacifier/soother. This is to ensure hygiene. Clean before each use. The pacifier/soother can be cleaned by washing with warm water. DO NOT use abrasive cleaning agents or antibacterial cleaners on the pacifiers/soothers. Excessive combinations of detergents may eventually cause components to crack. Should this occur, replace your pacifier/soother immediately. Wash your hands thoroughly and ensure surfaces are clean before contact with sterilized components.

WARNING: Please check the teat before use by pulling. Throw away at the first signs of damage or weakness. For safety and hygiene replace the pacifier/soother after 4 weeks of use.

* The nanobébé award winning Flexy pacifier/soother is included in both our Starter Set and the Newborn Set; and sold separately.
