

## Go Work Pop Wireless Headset - Black

### DATA SHEET

#### Product Information

EAN	812887019781
Brand	JLab Audio
SKU	10379577
Manu Part #	IEUHBGWRKPOPRBLK4

#### Headphones

Ear coupling	Supraaural
Headphone frequency	20 - 20000 Hz
Impedance	32 $\Omega$
Magnet type	Neodymium
Driver type	Dynamic
Driver unit	4 cm

Headphone sensitivity	105 dB
-----------------------	--------

## Performance

Product colour	Black
Product type	Headset
Headset type	Binaural
Wearing style	Head-band
Recommended usage	Calls/Music
Control type	Buttons
Volume control	Button
Clear sound	Y

## Ports & interfaces

Connectivity technology	Wireless
Bluetooth	Y
USB connectivity	Y
Wireless range	10 m
Bluetooth profiles	A2DP, AVRCP, HFP, HSP, SBC
Bluetooth version	5.3

--

## Battery

Battery type	Built-in battery
Battery operated	Y
Charging source	USB
Continuous audio playback time	50 h
Battery recharge time	2.5 h
Input voltage (earpieces)	5 V
Input current (earpieces)	0.5 A

## Microphone

Microphone type	Boom
MEMS (Micro-Electro-Mechanical System) microphone	Y

## Weight & dimensions

Weight	101 g

# Product Description

Wireless lightweight headset with multipoint and 50+ hours playtime **WIRELESS LIGHTWEIGHT HEADSET** The perfect lightweight headphone for your work life. Enjoy clear calls and all-day comfort (and playtime) with our lightest, comfiest headset yet. The powerful boom mic can be rotated up, when you're focused independently or down to allow colleagues to hear just you (not the dog barking or the doorbell). Transition from mobile to laptop without touching any settings and enjoy GO Work wired while stationary at your computer or wireless for more mobility to multitask. **BLUETOOTH MULTIPOINT** Connect wirelessly via Bluetooth to your PC, Mac, mobile and more. With Bluetooth multipoint technology you can connect to any two devices simultaneously. Transition from mobile to laptop without touching any settings. Here's how you can use Bluetooth multipoint. **LAB QUALITY SOUND** With EQ2 voice or music mode you can enjoy Lab Quality Sound whether you're on a call or listening to music. Voice EQ emphasizes more mid and high frequencies to emphasize human voice. Music mode is your standard frequency response with more emphasis on overall sound/bass. **CLEAR CALLS** Enjoy clear calls with the rotating boom mic and noise canceling MEMS microphone, which eliminates environmental sounds around you so that your voice remains crystal clear anytime, anywhere. **ALL-WEEK PLAYTIME AND COMFORT** You'll get a full work week in with 50+ hours of playtime one charge – and all-day comfort with Cloud Foam earcups. Rotate the boom microphone for listening only – and back down to take a call or video conference. **TOTAL CONTROL** Be in complete control to play/pause, answer/reject, volume, and track control with the convenient multi-functional buttons located on the headset. Or choose between two EQ settings: Work or Music mode.
