The Dianabol and Anavar are the most powerful anabolic steroid but these are considered as illegal. The Crazybulk has an ultimate solution as you can see: D-Bal is the supplement by the Crazybulk that is legal or alternative and has mimicry effects of Dianabol anabolic steroid. Unfortunately you are comparing very different steroids which are not in any way similar! For strength and raw size during the cycle you will be hard pressed to find something better than D-bol. For modest LBM gains and nice strength boost with few sides Anavar is king! both need to be stacked with test to be effective IMO. Anavar and Dbol cycle is essentially clubbing a bulking and cutting steroid together. Even though Anavar helps with cutting, it has much more to offer in terms of both muscle and strength building. This is why it can actually be used with Dianabol or Dbol. Anavar is supposed to be one of the safest steroids on the scene.
