A Short Deca Durabolin History Lesson. Like all the other anabolic bodybuilding steroids, Deca Durabolin has been around for a long time. The Organon pharmaceutical company created its first esters of 19-nortestosterone (Nandrolone) during the 1950s and applied for a patent in January 1959. Deca durabolin is predominantly used for bulking purposes, however due to it only building moderate amounts of lean muscle (by bodybuilding standards), it is often cycled with other, more potent AAS. Generally stacking steroids together leads to an increase in side effects, such as further elevations in cholesterol. Fact: Deca can be used for shorter cycles of 8-10 weeks with great results! Fiction: Deca will cause Deca dick right away. Fact: Even if you get this side effect, it usually won't happen until about 6-7 weeks into your cycle. Fiction: 2-300 mg/week of Deca is a small dosage. Fact: 300 mg - 400

mg/week of Deca is the most anyone should ever ... Deca Durabolin is a safe to use but when consumed at higher dosage it can cause severe side effects. About 100mg can decrease testosterone upto 57% and 300mg of Deca Durabolin can lessen 70% of testosterone production, but it important for you to complete a PCT. Deca Durabolin also known as Nandrolone Decanoate is a very popular steroid for bodybuilders. In the world of bodybuilding it is used for fast recovery and muscles growth. Nandrolone hormone first appeared in 1960 and two years later it was introduced in the market as Deca Durabolin. Since then, nandrolone came in the market under different names. Many types of steroids are being used in ... <http://meltedballoon.com/groups/buy-humatrope-cartridge-36iu-12-mg-from-usa-1-cartridge-eli-lilly-pofzpoi/members/all-members/>
