This blend allows a peak level to be reached rapidly, followed by an extended release. Trenbolone Mix 150mg. \$ 140.00 \$ 125.00. Active Ingredient: Trenbolone Mix / Tri Tren 150mg. Category: Injectable. Pack: 10 ml/vial (150 mg/ml) Drug class:

Anabolic/androgenic steroids. Chemical structure: 17beta-Hydroxyestra-4, 9, 11-trien-3-one. TrenaGen Mix is a Trenbolone mix of 3 esters, short and long acting (Trenbolone Acetate, Trenbolone Hexahydrobenzylcarbonate and Trenbolone Enanthate). This blend allows a peak level to be reached rapidly, followed by an extended release. This is to ensure that the level of hormone in your system remains constant and stable for as long as possible. Trenbolone Mix 150 is a steroid containing three different esters like trenbolone acetate, enanthate, and hexahydrobenzylcarbonate. These substances are present in equal amounts of 50 mg each. Due to the action of acetate product that has a faster action to start, the reason that can be compared with Parabolan at the beginning of the administration.
