

Veteran Affairs Program

Veteran Affairs Program At Sound Oasis, we salute our veterans and thank them for all of their sacrifices so we can be safe and free.

Tinnitus (ringing in the ear) is the most common injury that occurs from the loud noises of combat. There is no medicine or operation that can cure tinnitus.

Sound Oasis Sleep Therapy Systems (white noise machines) are highly recommended by audiologists as a very effective way to experience relief from tinnitus, especially at night when tinnitus tends to be worse in a quiet bedroom.

Our Veterans Affairs Program places free Sound Oasis machines in VA care facilities across America.
