Holster Clips

OVERVIEW

Holster, or belt, clips are commonly used to attach holsters to belts or other carrying devices for securely holding firearms, knives, or other tools. Our listed holster clips showcase our diverse offerings, but we also offer custom sizes & finishes. Images are not to scale.

When choosing the right holster clip for your project application, it is important to understand product terminology & grouping.
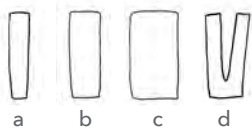

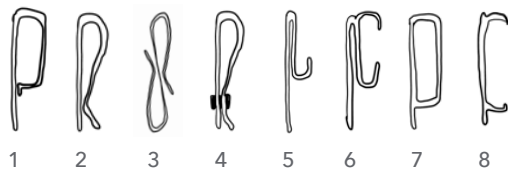

The following terms and variants are used by A+ Products, Inc. when describing holster clips

Details	**Finish**	Surface treatment or coating affects its appearance, durability & functionality. Common finishes include matte, gloss, chrome, textured powder-coated, anodized, black oxide, nickel plate
	Color	Common colors: black ⚫ nickel ⚪
	Material	Common materials include steel & plastic

Size	**Measurement** Clips height dictates thickness of application	= L x W x H mm 43 x 12 x 17 mm	
	Material thickness Directly impacts clips flexibility & strength	= T mm 0.4 mm	H 17 W 12 L 43 T 0.4

Style	**Type**	Locking Non-locking	Requires two hand removal One hand removal

1 2 3 4 5 6 7 8

	Design	1 Wrap around	Designed to wrap around a belt or strap
		2 Spring clip	Spring provides tension to ensure a fit
		3 Dual side spring	Attachment to multiple points simultaneously
		4 Snap clip	Separate snaps secure the clip onto a belt
		5 J clip	Attaches to the belt by sliding over it
		6 C clip	Curved shape distributes weight
		7 Closed loop clip	Belt or strap has to be fed through loop
		8 Fold over clip	Folds over a belt/strap to secure clip in place

a b c d

Features	**Face** Width across the front & back of clip	a Narrow	00 – 15 mm
		b Standard	16 – 25 mm
		c Wide	26 mm +
		d Split	Allows for greater flexibility

i ii iii iv

	Profile H = side of the clip at its greatest point	i Uniform space	Width of the side of clip remains consistent
		ii Bent-end	Curved or bent-end on one side
		iii Tapered-end	Clip tapers gradually towards one end
		iv Offset tapper-end	Taper does not reach end, affects attachment

Use	**Attachment** Ways in which clips are designed to attach or secure the holster or accessory	Clamp-style	Mechanism that allows it to grip onto the item
		Adhesive backing	Adhesion to smooth plastic, metal, or fabric
		Sewing/stitching	Fat or looped back can be sewn onto item
		Hook/loop	Velcro on the backside attaches to other patches
		Modular	Utilize proprietary connectors or adapters
		Holes	Screws/bolts to attach to surfaces [single, dual]

	Waistband	Inside waistband	IWB, often thinner & more discreet
		Outside waistband	OWB, typically wider & sturdier
