

 Continued from front

- 11 Plug the power supply of the EcoQube Air into a wall socket. The LED lights will turn on. The pump, fans and Humidifier\* will turn on as well. **Do not plug in the unit without water in the reservoir.**
- 12 To control your EcoQube Air, you must download the EcoQube app from **getecoqube.com/app**. A printed guide to this app is also included in this package.
- 13 Drain dirty water from the pump reservoir once a month. See **getecoqube.com/air** for full instructions and video.

Welcome to your new  
**EcoQube Air**<sup>TM</sup>  
Transform your living space

#### BEFORE YOU BEGIN

Please check the contents of your box against the side of the packaging. You can also watch our unboxing and set-up video here: **getecoqube.com/air**

# QUICK START GUIDE

EcoQube Air™

## TAKE NOTE

**Do not** shake your EcoQube Air.

**Do not** allow water on or near the edge connector or the electronics. Beware of water dripping from the greenhouse and grow tray.

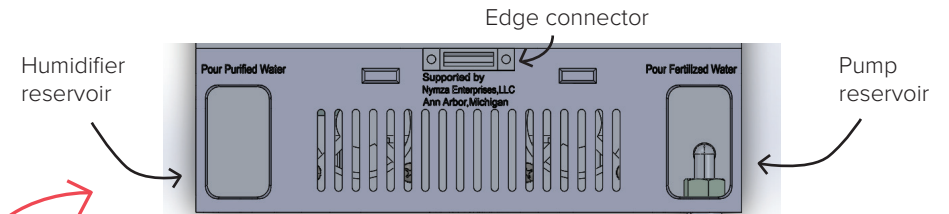

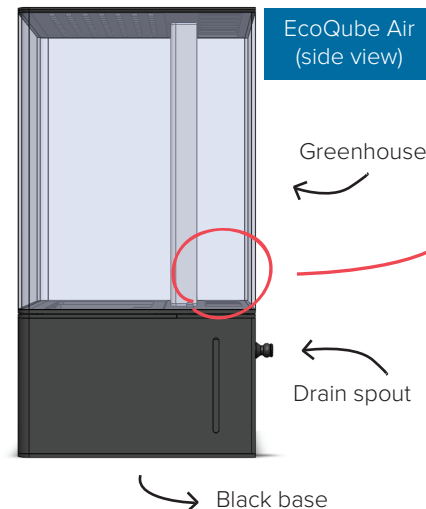

**Water damage is not covered in your warranty.**

- 1 Remove greenhouse and electricals, and accessories from packaging. Separate greenhouse and black base. Remove all accessories from greenhouse.

- 2 Lift the grow tray. Remove white box from the black base. It contains your power supply.

- 3 Remove the foam from the pump reservoir. Lift the base cover to remove the foam from the fan holder. If you have a Humidifier\*, remove foam from it too.

- 4 Place grow tray back on black base. Align the plant tray with the tube for the pump. Align the plant tray hole with the tube for the pump. The pump tube has to be perfectly aligned.

- 5 Mix fertilizer\* in 1 litre of purified water. For more information on fertilizer, see [getecoqube.com/fertilizer](https://getecoqube.com/fertilizer).
- 6 Pour the fertilized water into the pump reservoir up until the level indicated on the side of the EcoQube Air. Do not fill over the Max line. Add purified water once a week and ensure that the water level does not fall below the Min line.
- 7 If you have a Humidifier\*, gently pour purified water into the Humidifier reservoir up until the level indicated on the side of the EcoQube Air. Do not fill over the Max line.
- 8 Thoroughly soak the plant mediums, then place 4 pieces into the grow tray. Place the clay pebbles into the the grow tray. Do not cover the tops of the plant mediums.
- 9 Insert 2-3 seeds into the slit of each plant medium. You can also splice and place in live plants of your choice. See: [getecoqube.com/splice-air](https://getecoqube.com/splice-air)
- 10 Place the greenhouse back on the black base by aligning the LED strip to the edge. Ensure that the greenhouse is flush against the base.

\* Fertilizer and humidifier sold separately
