Automatic Hand Sanitizer Dispenser with Acrylic Mounting Bracket

Automatic Hand Sanitizer Dispenser with Acrylic Mounting Bracket

Our Automatic Hand Sanitizer Dispenser provides a hands-free sanitizing station wherever you need one – on a wall, on a kiosk, or on-the-go. This versatile unit dispenser and mounting bracket unit clamps easily to CTA's mobile floor stands. It can also be mounted onto walls or other flat, hard surfaces with screws (included), silicone, or double-sided foam adhesive pads (adhesives not included). The hand sanitizer can be powered in two ways. For permanent installations, use the side port DC plug. To go cordless, simply use four 5V batteries (not included). Once in place, the sensor automatically detects a hand, then delivers a supply of sanitizer – all without buttons, levers, or the need to touch the dispenser. Refills are a snap. Use the included key to open the front shell. Use either the included refillable bottle or replace with a new disposable bag. The handy catch tray prevents messy spills.

Features:

- Automatic foam pump and spray nozzle automatically deliver just the right amount of hand sanitizer
- Unit comes with a 2-piece acrylic dispenser holder with catch tray
- Powered by either DC Port (Cord not Included) or with four (4) 5V Batteries (Also not included)
- The front shell unlocks with key (included) to either refill sanitizer bottle or replace disposable bag
- Works seamlessly with CTA's Paragon Floor Stands and mobile floor stands

Specifications:

- Dimensions:
4-3/4 x 10-1/4 x 4-1/8-inches

Package contents:

- (1) Automatic Soap Dispenser
- (1) 2-Piece Acrylic Mounting Bracket
- (1) Special Key
- (1) Set of Assembly Hardware
