Heavy-Duty Security Gooseneck Clamp Stand w/ VESA Plate

Heavy-Duty Security Gooseneck Clamp Stand w/ VESA Plate

This tablet clamp gives multi-direction flexibility to any digital workstation, making it perfect for use in home offices, warehouses, gyms, conference rooms, and any place that requires a rugged tablet stand. The clamp itself comes with a top groove that tightly grips to pipes or poles. To mount to tables or countertops, simply add the included rubber grip flat insert into the groove to create a scratch-protected, secure grip. The bendable gooseneck provides a wide array of positioning options and a standard 75 x 75 and 100 x 100-millimeter VESA Plate that can be used with any compatible case, including CTA's popular Paragon Enclosure (PAD-PARAW). The clamp tightens with a convenient rotary handle. The VESA plate can be rotated for use in both portrait and landscape orientations.

Features:

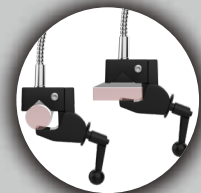

- Sturdy metal clamp with flexible gooseneck
- Durable, ultra-flexible 24-inch gooseneck
- Heavy-duty adjustable clamp with no-slip rubber grips
- The joint tilts 180 degrees and rotates 360-degrees for portrait or landscape viewing
- C-clamp fits any table, pole, or countertop surface up to 1.25 inches thick
- Compatible 75 x 75-millimeter VESA mount compatible enclosures, including CTA's Paragon enclosures

Specifications:

- Overall Dimensions: 31.5"L x 6.5"W x 1.9"D
- Maximum clamp width for poles: 2.75 inches
