VESA Compatible Laptop & Other Device Holder with Built-in Cooling Fan

VESA Compatible Laptop & Other Device Holder with Built-in Cooling Fan

This portable cooling fan is a must have for students – or anyone needing to lower the temperature of their laptops (or other devices) while working in coffee shops, offices, or high-temperature environments like warehouses or warm-weather construction sites. The fan sits beneath a laptop and blows cool air into the bottom device vents. It must be mounted to a VESA-compatible 100 x 100-milimeter desk stand or car mount. To fit the laptop, place front edge along the 2 front brackets, then turn the grey knobs until side brackets grip the sides of the laptop. Then rotate rear bracket arms to clamp laptop in place. Rubber grip pads beneath the fan unit prevent sliding. This fan case has plenty of space to store and route USB cable from the fan unit into laptops. Compatible with 7-15" laptops, projectors, and 10-13" tablets!

Features:

- Sturdy plastic fan unit with metal brackets
- Ideal for use in coffee shops, offices, high-temperature warehouses and construction sites
- USB-powered fan cools laptops that run hot due to long use or weather conditions
- Brackets cradle laptop securely in place
- Works in conjunction with standard 100 x 100 VESA compatible desk, clamp, or car mounts! (sold separately)
- Rubber padding grips on the bottom of the fan help hold the unit in place
- Compatible with laptops, tablets, and projectors.

Specifications:
