

Slim VESA Wall Mount For Monitors

ADD-MVWM

Slim VESA Wall Mount

CTA Digital's Slim VESA Wall Mount provides lots of tilt capabilities – and is an efficient solution for hanging monitors at retail stores, reception desks, classrooms, gyms, or any place where information or entertainment is required. Installation is simple. The sturdy metal canopy attaches securely to either wall studs or solid walls via pre-drilled holes in the mount and included hardware kit. 13-27-inch monitors attach in both portrait and landscape orientations via standard 75 x 75 and 100 x 100-millimeter VESA plate. Once on the wall, monitors tilt 3-degrees up or 12-degrees down to create the ideal viewing angle. To adjust, loosen central pivot joint with the included hex tool. When the desired angle is found, simply tighten the joint. Cables can be routed neatly through the wall. Compatible with screens up to 55 lbs.
