Locking & Folding Security Laptop Desk Mount

Locking & Folding Security Laptop Desk Mount

Create a protected laptop station wherever you need to work with CTA Digital's Locking and Folding Security Laptop Desk Mount. This lightweight, durable mount helps secure laptops in public places like coffee shops, libraries, hotel lobbies, and other high-traffic areas. To use, place laptop in the padded bracket and adjust arms to snugly fit between two telescoping laptop arms. Then, lock arms in place with the included key. As an additional theft deterrent, insert security cable into the device's Kensington slot, and loop the other end around table legs, pipes, or benches. The stand allows users to adjust the screen angle between 45- and 125-degrees for optimal viewing. If desired, this mount can be permanently attached to surfaces via pre-drilled holes. Padding along the base of the unit protects countertops and helps prevent slipping.

Features:

- Sturdy, lightweight laptop holder with adjustable screen plate
- Locking arms cradle laptop to the desk mount
- Padded base and interior protect both laptop and surface area from scratches and slippage
- Back plate allows angle adjustment from 45- to 125-degrees
- Pre-drilled holes allow permanent attachment to surfaces
- Convenient key lock secures laptop in desk mount
- Optional cable provides additional security
- Compatible with laptops that have a screen size of 12.2"-17".
