

Dual Security Kiosk Stand with Locking Case and Cable

For Tablets

PAD-ASK109W

Easily adjusts for horizontal or vertical views

Dual Security Kiosk Stand with Locking Case and Cable

This versatile security stand makes your iPad the protected centerpiece of a streamlined workstation, kiosk display, or retail point of sale. The base rotates 360 degrees, while the enclosure flips fully front-to-back for easy customer-to-register interactions. The enclosure also rotates 360 degrees for use in portrait and landscape orientations. This locking enclosure keeps devices protected from theft with lock-and-key security. For an optional added measure of protection, loop the included steel security cable around a permanent fixture and secure to either the stand base or back of the case. The enclosure allows full access to your tablet's ports, buttons, cameras, and headphone jack, for card reader compatibility. It also includes an optional metal home button cover to block unwanted menu access. This kiosk features a cable management to keep cords out of site and prevent the need to plug and unplug the iPad. This stand includes a stylus with an elastic tether and built-in holder on the base. The base can mount permanently to countertops via pre-drilled holes and included hardware or adhesive silicone pads. Compatible with iPad 10th Gen 10.9", iPad Air, and 11" iPad Pro.

Features:

- Enclosure flips fully front to back for easy switches between customer and register sides
- 360-degree rotating base
- Portrait and landscape displays
