Kickstand Handgrip Case with Security Enclosure Jacket For iPad Pro 9.7 inch

Kickstand Handgrip Case with Security Enclosure Jacket

Durability and security finally stop getting in the way of convenience with the Kickstand Handgrip Case with Security Enclosure Jacket for iPad. The sturdy key lock allows for total peace of mind, and the robust aluminum shell (which fits snugly around a protective plastic case) will keep your iPad free from scratches, dents, and other unsightly marks. That aluminum shell even serves two purposes: it can be fixed to a wall to function as a kiosk, but is light enough to be carried around and serve as an extra-durable case. Even the screen is protected with a touch-sensitive plastic window. In the back, a 360-degree rotating comfort hand-grip allows you to keep a strong grip on your tablet in any situations. Ingeniously snuck inside the grip is a kickstand that easily pops out and supports your tablet on any desk or table, allowing you to use a Bluetooth keyboard like a laptop or simply enjoy some streaming television. The Kickstand Handgrip Case of iPad is compatible with the iPad Pro 9.7.”
