

Locking Tablet Mount and USB Hub with Full Cable Management and Universal Holder

PAD-LTMUH2H

Locking Tablet Mount & USB Hub

This sturdy arm mount and enclosure combines a generous set of adjustments, joints, and pivot points, convenient clamp, and universal tablet holder that transforms any counter, desk, or table into a versatile digital workspace. The universal enclosure works with virtually all 7-13-inch tablets. The stylish diagonal grip allows easy access to all plugs, headphone jacks, ports, or credit card readers. A convenient and powerful lock and key system deters theft. The adjustable grip and exchangeable foam pads allow this universal wall mount to hold any device you want, with or without a protective case. The arm installs easily using an adjustable scratch-protected C-clamp. The mount features a full 90-degree rotation for use in either landscape or portrait orientation. The spring-loaded elbow joint adjusts 180-degrees. To create the perfect work angle, simply loosen the mid joint with the included Allen wrench, position, and tighten. The base joint rotates 135-degrees to facilitate just the right viewing angle. At the base of the mount, you'll find a handy USB extension port for easy charging while in use. Just plug the attached USB cables into a computer or other power source, then plug your tablet directly into the base of the stand. Interior cable routing system within the arms gives ample space to keep cords out of site.

Features:

- Universal locking mount with smooth adjustability
- 75 x 75-millimeter and 100 x 100-millimeter VESA plate easily connects to any VESA-compatible mount
- VESA plate rotates 90-degrees for use in both landscape and portrait orientations
- Elbow joint tilts a full 180-degrees and locks in place with Allen wrench (included)
