# Quick-Connect Dual Tablet Mount with Height-Adjustable Arms For 7" Tablets

Easily adjusts for horizontal or vertical views

## Quick-Connect Dual Tablet Mount with Height Adjustable Arms

If you need two iPads in close proximity, there are few stands that give you more options than the Quick Connect Dual Tablet Mount with Height-Adjustable Arms. CTA's quick-connect grips allow you to snap your tablets on or off in seconds, and easily attach to any tablet up to 7" in width. Dual swiveling height-adjustable mounts allow you 360 degrees of tablet rotation, making the devices viewable in landscape mode, portrait mode, or anything in between. The hinges also sport total articulation, and the ability to quickly and easily adjust height so you can view the tablets from any angle. Our hefty base is designed to be stable, allowing you to easily swivel and adjust the tablets without knocking things off balance or putting your expensive devices in danger. Best of all, the sleek, matte-black styling is non-intrusive and minimalist, blending in with almost any design scheme or environment. The Quick-Connect Dual Tablet Mount is compatible with tablets up to 7" in width.
