

PAD-TDSK

Tablet Desktop Security Kit with Display Stand and Theft-Deterrent Cable

For Tablets and Phones

Tablet Desktop Security Kit

This portable tablet security kit gives you the theft-protection and display options of a bulkier kiosk while occupying only a fraction of the space. First, the compact metal plate sticks on to the back of your tablet with an industrial grade 3M adhesive strip, withstanding even forceful attempts at removal. Next, the steel security cable locks into the Kensington slot on the plate with an included key, anchoring your tablet to a table leg or other permanent fixture at the other end. The cable can also be looped to this kit's metal stand base, which itself can mount to your desk, tabletop, or counter via holes at the base. This metal stand base supports your tablet in landscape or portrait orientations and is outfitted with a cutout to allow access to your device's charge port. The stand also features no-slip, no-scratch padding within its lip and on its underside.

Features:

- Compact metal security plate attaches to tablet with industrial grade 3M adhesive
- Steel security cable locks onto Kensington slot on metal plate
- Metal display stand mounts to desk, tabletop, or counter with included hardware via holes at base
- Slip and scratch resistant rubber padding in stand lip and on underside
- Perfect for trade shows, retail points of sale, check-in desks, offices, classrooms, and more
- Compatible with all tablets and phones

Package Contents:
