### INSTALLATION:

#### 1. Attaching Phone Holder to Articulating Arm

1A. Rotate in the phone holder in the articulating arm adapter until securely tightened.

#### 2. Attaching Articulating Arms to Base

2A. Slide the articulating arm into the dedicated mount location on the base. Rotate in screw until moderately tightened with your hand, no extra tools needed. Repeat to the other side.

#### 3. Attaching Device to Holder

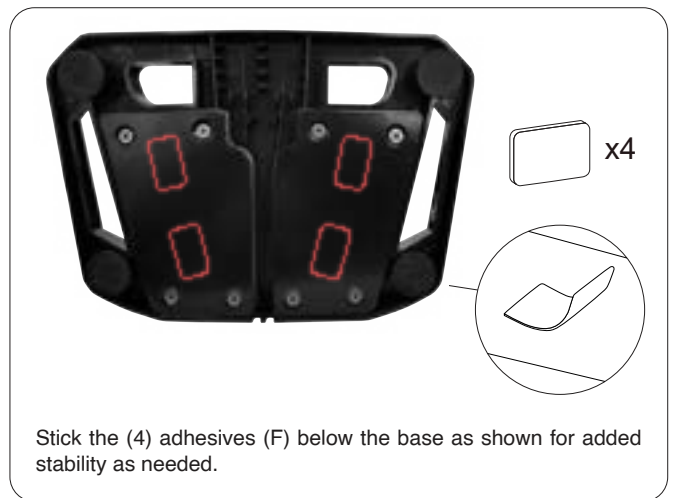

3A. Use both hands to extend the holders. Make sure that your device size is compatible with each of the holder.

3B. Insert your device inside the holder and release it to contract it.

\*\*Tablet and phone shown for illustration only, NOT INCLUDED

#### Optional. Attaching Adhesive Pads

Stick the (4) adhesives (F) below the base as shown for added stability as needed.

## Portrait & Landscape Adjustability

Rotate each holder to the desired orientation.

## Tilt Adjustability

Rotate each joint to create the desired setup.

## Base Swivel Adjustability

Rotate to the desired angle. Securely tighten the bottom screw to create a more fixed setup.

## Cable Management

Use hooks to route cable out of the way.
