# Universal Tablet and Phone Adjustable Desk Mount

## Universal Tablet and Phone Adjustable Desk Mount

CTA Digital's Universal Tablet and Phone Adjustable Desk Mount creates an instant content creation station, presentation, tool, or space-saving workstation with loads of adjustability. It's perfect for video conferences, live videocasts, or jobs requiring a fast, versatile setup. Both the tablet holder and phone holder feature spring-clamps that snugly cradle 7"-12.2" tablets and 2.4"-4.5" phones in place, all while leaving ports and buttons free for use. The heads of both holders feature omni-directional ball joints that can be maneuvered for either portrait or landscape orientation. Both heads are controlled with simple adjustment wheels. Center and base joints loosen and tighten via knobs and base joints swivel 360-degrees. Cables can be clipped along the arms and routed for a neat, clean workspace. This stand is lightweight and portable. The base contains 4 felt pads that protect desks from scratches. Use the included (and optional) adhesive pads for a more permanent mounting solution.
