

# Height-Adjustable Rolling workstation Cart with Adjustable VESA Arm Mount

Easily adjusts for horizontal and vertical views

Expand your digital workstation, with CTA Digital's Height-Adjustable Rolling Workstation Cart with Adjustable VESA Arm Mount. This workstation cart gives you nearly limitless angle-adjustment and all of the mobility of a smaller wheeled stand, making it a perfect addition to a nurse's station, classroom, tradeshow, or conference room. Your monitor connects to the VESA grip-ring located on a support pole at one of the cart's ends. This grip ring can be positioned at any height along the pole, while the VESA plate tilts and rotates 360 degrees for expansive display options. This VESA plate can also interface with CTA Digital VESA-based tablet holders (PAD-CSWM, PAD-RWM, PAD-RWMW, PAD-VTH). The spacious surface area gives you plenty of room for your laptop, keyboard, or desktop PC, while a dedicated power-strip compartment located underneath ensures that your charge cables stay connected and out of sight. The cart also features a smooth, intuitive standing desk style height-adjustment mechanism. Simply grab the two adjustment handles on the cart's underside, and gently pull to achieve your desired height. 4 attachable, locking swivel casters give you easy rolling on flat surfaces.

## Features:
