

Heavy-Duty Adjustable VESA Arm Mount with Antiseptic Powder Coating

This heavy-duty arm mount is custom built for a doctor's office or other medical setting, and meets all the requirements for that environment. The antiseptic powder coating helps prevent the spread of contagions. A hollow arm and fully-integrated cable-management system means fewer wires to clutter up the surrounding workspace. An industry standard VESA 75/100mm adjustment and 8kg load capacity means it can support most monitors up to 40inches (we recommend you check factory specs). The 1800mm arm extension length and convenient double-gas spring system means that monitor can be tilted, swiveled, and swung around the room to wherever it's required with very little effort expended. The Heavy-Duty Adjustable VESA Arm Mount with Antiseptic Powder Coating is a sturdy, reliable, and flexible monitor support system that will meet all your medical requirements.

Features:

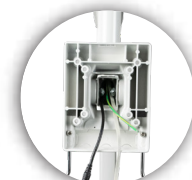

- Sturdy arm allows convenient attachment for LCD monitor or TV screen
- Monitor can be easily tilted and swiveled for easy viewing
- Double gas spring system offers easy height and distance adjustments
- Hollow arm conceals cables for easy management
- Antiseptic Powder Coating

Specifications:
