If you want to do a performance, choose a favorite story and the best performers and have the student perform on the last day!

NOTES:

If you do not have enough story titles to allow all students to be reading at the same time, you can alternate activities with reading time so that students take turns reading the stories. You can also read the stories over a longer period of time, say once a week, instead of three or four times per week, and do activities, games and exercises in between. One of the advantages of Reader's Theater is that it's flexible. It can easily be tailored to fit your budget and time constraints.
