PURE PLEASURE WITH POUR OVER

OUR NEW PORCELAIN ARTICLES FOR PERFECT COFFEE ENJOYMENT

„POUR OVER“ IS THE HOTTEST NEW COFFEE TREND.

Hand filtered coffee gives you perfect coffee flavour! What most people don't know – our founder Melitta Bentz invented coffee filtration in 1908. So that you can benefit from this trend, we have expanded our Pour-Over range:

WITH AN IMPROVED PORCELAIN COFFEE FILTER HOLDER AND A NEW ELEGANT PORCELAIN COFFEE JUG!

Many coffee lovers associate porcelain with very special values – quality, style and elegance, but also timelessness. So porcelain is the ideal material for Pour Over articles, because this is after all the original and best way to make coffee.

COFFEE FILTER HOLDERS WITH IMPRESSIVE NEW FEATURES!

As well as its harmonious design our new coffee filter holder gives you convincing selling points – The „Vision Control“ viewing window in the bottom of the filter allows you to look into the cup or jug at any time – without lifting the filter. But that's not all – the bottom of the filter has been redesigned so that two cups of coffee can now be brewed at the same time.

OUR NEW COFFEE JUG – A TREAT FOR THE EYES

The design of our new porcelain coffee jug is also a delight. The newly designed lid forms a harmonious unit with the jug. And the modified handle nestles gently in any hand.

LAST BUT NOT LEAST – A GOOD PRICE!

Both products will impress your customers with their value for money.

SO THAT COFFEE ENJOYMENT BEGINS WITH THE COFFEE PREPARATION:

- Consistent coffee extraction due to the improved rib design in the coffee filter holder
- Possible to prepare two cups of coffee at the same time
- See and enjoy the coffee being prepared – with 'Vision Control'

Product name	GTIN 40.06508.
