

CLEANING AN EGR

BEFORE

AFTER

WHAT IS AN EGR?

EGR stands for exhaust gas recirculation. The EGR cooler lowers the temperature of the exhaust gas as it recirculates back to the intake manifold in what is known as a high-pressure loop EGR system.

THE CLEANING PROCESS:

- Visual inspection & pressure test of your EGR
- Gold Service restoration cleaning service (24 Hour Turnaround)
- Cleaning report prepared for you showing you test results as well as before and after pictures

If your EGR cooler has failed inspection and pressure testing after step one, we will contact you to discuss why the EGR has failed and what replacement options are available.

EGR CLEANING REPORT

- Guaranteed clean
- Restores filter to 98%
- 4 step process
- 1 Year Warranty
