(1) Connections are made at factory and lead times apply
(B) Anti-wicking ferrule come as standard for all IP67 and above connections and are to protect the Neon connector cable from water ingress.

If ferrule will not work for your installation, you can chose to not have them included. However without ferrule, any damage from cable water ingress will not be covered by the warranty.
See installation guide for more information.
 FERRULE

Check all connector measurements on the models installation guide which provides dimensions. Download from the Bright Light website.
