BL-PC-DIM-2007

Repeater
LED-RPT-921

As part of the new Westfield complex in Newmarket, ASC Architects approached Bright Light about some bespoke feature lighting for the new ANZ branch. The lighting selected included Neon Arc which wrapped around the front glass wall and continued throughout the branch office space. Neon Arc was used above and below the walls and also to illuminate the ANZ logo at the store frontage.

A custom suspended central light feature which reflected the ANZ logo was created using Neon Classic - selected for its wider beam angle. In both locations RGB Neon was used to ensure the perfect ANZ blue colour - the result speaks for itself.
