PHOTO CREDIT: VICTOR CARINGAL FROM ARUP

Neon Arc is a square W16 × H17mm, vertical bending model perfect for cove lighting, or architectural features in exterior and interior applications.

RGB (Red, Green, Blue) ribbon provides a rainbow of colour options from hot pinks to vivid blues and anywhere in-between. RGB Chasing gives you dynamic control, pixel segments are independently addressable allowing chasing & blending movement of colours. Requires controller.

Neon is made to order, check with our team for lead times.

### \*STATIC VS DYNAMIC OPERATING

This product has a maximum wattage of 16.5W/m which is reached when all colours R+G+B are used simultaneously to create a white tone, with 3 × colour channels using approximately 5.5W/m each. Using Neon at this maximum load is called Static full loading (all colour channels, all powered continuously).

When R, G or B channels are used individually or blended to make colour mixes eg blue or purple (excluding white tones) the wattage used is below the maximum load and is considered dynamic operating. This also applies when the colours are constantly changing (including if a white tone is created but only used in a chasing, flashing or fading capacity).

*When the maximum wattage of the product is reached, lengths longer than recommended may experience power loss, reduced luminosity & increased heat which can shorten the life of the product.*

**If unsure about the products intended usage, future proof by choosing the static full loading lengths.**

## NEON ARC | RGB CHASING | CONNECTIONS

Neon products are IP rated based on the fitted connections (power feed / end caps).

Bright Light recommend using Slimline injection moulding for the best result, a clean finish and IP68 rating. These are fitted at factory during the production process and can not be altered once produced - **ensure all lengths are double-checked before ordering.**

Power feed connectors are priced & supplied with 1metre cable as standard. Please specific at time of quoting if alternate lengths are required.
