# NEON CLASSIC | DIM TO WARM | SILICONE

Neon is a broad range of silicone encapsulated LED ribbons with a variety of light emissions and casings that closely reference glass neon tube.

Neon Classic is a perfect replacement for traditional glass neon tube with dimensions of W16.5 × H29mm (W11.5mm at the base) model.

Dim to Warm allows the lighting to warm up as the light is dimmed, creating a cozy feel that is perfect for evenings. It provides 3000K lighting at full brightness, slowly reducing to a warm 1800K before dimming completely.

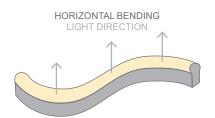

Neon is made to order, check with our team for lead times.

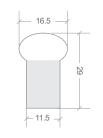

#### **APPLICATIONS**

- Cove lighting, handrails, or toekicks
- Architectural features
- Exterior or interior installations
- Swimming or feature pools

#### FEATURES

- A perfect replacement for traditional glass neon tube

## NEON CLASSIC | DIM TO WARM | CONNECTIONS

Neon products are IP rated based on the fitted connections (power feed / end caps).

Bright Light recommend using Slimline injection moulding for the best result, a clean finish and IP68 rating. These are fitted at factory during the production process and can not be altered once produced - **ensure all lengths are double-checked before ordering**.

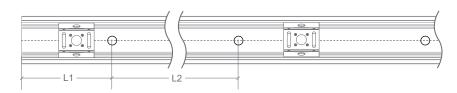

If on-site cutting is required (due to lengths being unknown in advance or site design alterations), Snap connector fittings can be used instead. Snap Connectors can be fitted on-site and offer an IP67 rating (provided all installation instructions are followed correctly).

Power feed connectors are priced & supplied with 1metre cable as standard. Please specific at time of quoting if alternate lengths are required.
