

## NEON EDGE | TUNEABLE WHITE | SILICONE

### APPLICATIONS

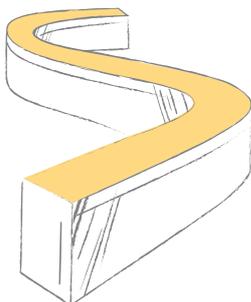

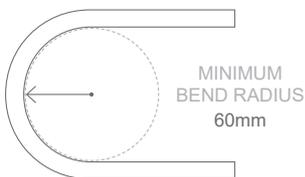

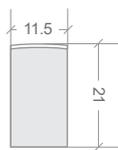

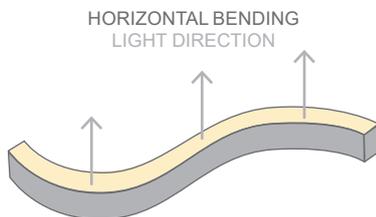

- Ideal for applications where colour temperature adjustment is required
- Cove lighting, handrails, or toeckicks
- Architectural features
- Exterior or interior installations
- Swimming or feature pools

Neon is a broad range of silicone encapsulated LED ribbons with a variety of light emissions and casings that closely reference glass neon tube.

Neon Edge is a sleek W11.5 x H21mm model.

Tuneable White lighting can be adjusted to suit the environment and time of day. Warmer temperatures create a cosy feel that is perfect for evenings, while cooler temperatures simulate day light, creating a more alert feel.

Neon is made to order, check with our team for lead times.

## NEON EDGE | TUNEABLE WHITE | CONNECTIONS

Neon products are IP rated based on the fitted connections (power feed / end caps).

Bright Light recommend using Slimline injection moulding for the best result, a clean finish and IP68 rating. These are fitted at factory during the production process and can not be altered once produced - **ensure all lengths are double-checked before ordering.**

If on-site cutting is required (due to lengths being unknown in advance or site design alterations), Snap connector fittings can be used instead. Snap Connectors can be fitted on-site and offer an IP67 rating (provided all installation instructions are followed correctly).

Power feed connectors are priced & supplied with 1metre cable as standard. Please specific at time of quoting if alternate lengths are required.
