CIRCOLO

DESIGNED BY PATRYK KOCA, DEVELOPED BY SQUARE BEAR

About the Designer

Patryk Koca is a Sydney based product designer aiming to converge his experiences into practical solutions through problem solving, craftsmanship, technology, and a strong focus on sustainability. Since graduating Patryk has engaged in a variety of activities including product development, consulting, exhibiting, and lecturing.

Patryk has a strong reputation within the furniture and architectural industry, and began collaborating with Square Bear in 2022 to develop a soft seating and acoustic range that has been an incredible experience in pushing the boundaries of clever design for a post-pandemic workplace, understanding consumer's desires as well as pushing the limits and efficiency of local manufacturing and upholstery expertise.

The result is CIRCOLO - a broad collection of modular seating with exquisite finishes and infinite adaptability.

“I strongly believe that functionality and usability of a product is vital, but creating products using ethical and sustainable methods with timeless value is becoming increasingly important. Being trained in the value of aesthetics, my role is to marry an often limited manufacturing process with a set of principles that will result in a beautiful object to remain desirable for decades. Bridging together ethical design and manufacturing with timeless styling for a positive future is my driving philosophy.”

Patryk Koca, Product Designer

CIRCOLO

MODULAR SOFT SEATING

CIRCOLO is a smart and infinitely modular soft seating collection that harnesses the need for both agility and acoustic comfort.

Designed through the exploration of logical geometry to facilitate a number of unique opportunities, the collection is based on a circle inscribed into a square to become the ultimate building block for specifiers and end users.

The collection is a contrast between curvature and the straight angular with a twist of playful softness. Negative space becomes positive space to incorporate supporting elements such as power, lighting, and tables when required.

CUSTOMISABLE FEATURES

CIRCOLO is a soft seating collection that is fun and playful.

Predominantly upholstered to provide opportunities for the specifier to create unique colour combinations for each project, with pieces including lounges, single seats, high backs, low backs, and ottomans that complement each other to create a setting suitable for multiple use in commercial environments.

Easily moved, endless configuration possibilities, and creative freedom for casual seating and comfortable meeting spaces.

Independently specify the finish for the seat surface, the seat base, the high back inside and out and the signature buttons on the sides. The base trim is finished in sustainably sourced timber and the main touch points such as optional fixed tables can be specified in natural timbers or laminates.

Creative freedom to specify the perfect finish for your project

LOOSE

SOFT SEATING

Designed as freestanding seating with low or high back privacy panels.

- Single Seat
- Double Seat
- Triple Seat

Multi-functional seating options for workplace environments such as lobbies, meeting areas and casual spaces.

MODULAR

INFINITE CONFIGURATIONS

CIRCOLO MODULAR system is designed as geometric connecting pieces that are easily moved to create unlimited design possibilities that work for any individual space.

Suitable for a variety of environments ranging from lobbies to open plan workplaces to meeting areas, CIRCOLO adds geometric softness with straight and curved pieces nestled together to form an adaptable and flexible modular system that includes armchairs, sofas, low and high back elements.

Create zones to invite comfort, focus, interaction, or relaxation within the workplace.

SQUARE BEAR AND SUSTAINABILITY

Sustainability is extremely important to us. Our product designs carefully consider the impact on the environment from the initial concept through to the choice of material, process of production, lifecycle, and recyclability.

Most importantly, we care about people – your people, our people, our supplier’s people, and all the people who at some point may end up working in the manufacturing industry.

We are committed to eliminating modern slavery, we carefully select our supply partners, and we double check the suppliers of our supply partners to ensure we are working with people who are aligned with our views on human rights.

We work with consultants to obtain appropriate industry standard certification and to assess our performance on an ongoing basis. We continually consider our environmental impact, social responsibility, and strategies towards a sustainable future.

CIRCOLO

For workplaces that like to play!
