

1001 Series Cooler Doors

Designed for Condensation-Free Operation

1001 Series Cooler Doors

Designed for
Condensation-Free Operation

An easy-to-install complete package unit, with cooler doors to suit a wide range of store applications and climate conditions.

Standard Cooler Doors - designed with door and frame heat for condensation-free operation in a wide range of climate conditions.

Energy-Free Cooler Doors - high performance insulated glass unit with no glass or door heat.

Torquemaster™

For complete door adjustment - in seconds! Anthony's Torquemaster™ quickly adjusts door closing tension and centers the door in its frame - with only a regular screwdriver! Providing the benefits of efficient closing action, lasting torque control, and precision door mounting, it works so easily that store maintenance personnel can easily make adjustments, when necessary - without special tools!
