STEP 2 Design

Our team will work with you to design your garments exactly the way you like, you just tell us what how you want it to look!

STEP 3 Presentation

Based on the consultation with our team and the design brief provided, we will then present your designs to you. 3D imaging is available if required to help you visualise exactly how your kit will look.

STEP 4 Approval

Once you're happy with your look, we ask you to sign off and approve one final check allowing us to place your order into production.

STEP 5 Enjoy!

Time to sit back and enjoy your new custom made Umbro kits. It really is that simple!

WHY UMBRO

STOCK ORDER PROCESS

STEP 1

Browse through our catalogue and pick out the styles and colours you want for your club.

STEP 2

We set you up with all the tools and guide you through our simple process of getting all of your players sized up accordingly.

STEP 3

Confirm the artwork of your club logo, sponsor logos and player numbers. We will then take care of having them all carefully applied to your garments.

STEP 4

Simply enjoy your new kits as we have them delivered to your nominated address!

EMBELLISHMENTS

LOGO APPLICATIONS

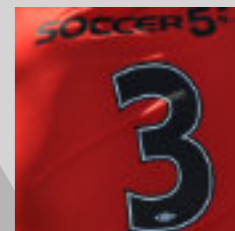

We take the hassle out of embellishing for you by having all of your club logos, player numbers and sponsor logos applied before delivery. Choose from one of our many options for your clubs logo; Vinyl, Embroidery, Woven or Silicone.

HEAT SEAL

Heat Seal is the use of a vinyl with an adhesive backing, this is the most common form of embellishing. The technology of the vinyl has improved over the years & almost every jersey in most sports will have some form of heat seal vinyl. The most common use is for numbering jersey's & sponsors logos.

The advantages of heat seal vinyl is no minimum requirements, cost effective easily applied to most garments. The only disadvantage is that you can't put them in a tumble dryer as it will affect the adhesive.

SCREEN PRINTING

This is the application of a logo using a special paint applied through a screen onto the garment, to give it a long lasting finish when dried. The process is effective for 1 to 2 color logo's & can be applied to most garments.

Advantages: 1 color logos can be very cost effective & quick turnaround. Disadvantage: multi-color logos will be more expensive than the above mentioned options

WOVEN BADGES

Woven badges are the preference of choice for most International teams & local A-League clubs around Australia.

The detail that can be achieved in a woven badge is much greater than the stitches by an embroidery machine. The badges can be applied in two ways; Heat Seal where the back of the badge has a special adhesive applied & when pressed at 150 degrees will activate the glue to adhere to the garment.

EMBROIDERY

Traditionally the most popular choice for clubs around the world, less and less clubs require this type of embellishment. Although slightly more costly, we do still offering embroidery service to our clubs, proving handy in situations where other forms of embellishment just cannot do the job.

The big advantage is that your logo is stitched into your garment, so it can never come off and will not lose colour. The only real downsides are the higher cost and whether some players may find the back of the logo irritating on their chest.

MEDALLION

Although woven badges have become the number one choice of club logos for clubs, silicone logos are becoming a lot more popular. This unique logo type allows you to highlight certain features in your club by being able to have different types of textures, or raise/lower certain parts of your logo. These logos are applied according to very specific heat pressing instructions, and cannot be sewn on.

The main advantage of the silicone logo is that it will have your gear looking it's best with a premium looking logo on display. The main downside is they cannot be used on all garments/products.
