

Nest boxes: Sizing and siting

Provide a safe & comfortable home for birds to roost and nest.

Natural nest holes do not come in standard sizes which is why we vary hole size to attract different species.

5.5m

Siting Guide

- Fix securely between 1.5 m and 5.5 m high.
- Shelter the box from wind, rain and strong sunlight.
- Keep away from bird feeders and other nest boxes as close proximity may promote aggressive behaviour.
- Ensure the box is not easily visible or accessible to predators.

1.5m
